Johnson Decries Racial Prejudice

President Lyndon B. Johnson, Md., who 24 Negro students said Thursday night that they were arrested Wednesday in a riot in which they were charged with looting a store. Two Negroes were arrested in the riot, which broke out after the students were told that the store was closed. Johnson said that the riot was a result of racial prejudice and that he was determined to do everything in his power to end it. He said that the riot was a disgrace to the city and that he was ashamed of the people who took part in it. He said that he was determined to do everything in his power to end racial prejudice and that he was determined to do everything in his power to end the riot.

Court Hears Pathologist Tell How Twins Died

KAMLOOPS (CP) — A pathologist testified today that the cause of death of two young boys who died in a house fire last week was a combination of factors. The pathologist said that the boys were killed by a combination of factors, including the fire and the way they were trapped. He said that the boys were killed by a combination of factors, including the fire and the way they were trapped. He said that the boys were killed by a combination of factors, including the fire and the way they were trapped. He said that the boys were killed by a combination of factors, including the fire and the way they were trapped.

ANN LANDERS

Enrich The Lives Of Those Near You

Dear Ann Landers: Today I read the letter about the 15-year-old girl who was abandoned by her retarded brother. I am sorry for her.

I am 15 and have a little 6-year-old brother who is also retarded. He is the most lovable little kid I know. Everyone in our family shows him with affection and he returns it tenfold.

You are right, Ann, when you say it is the responsibility of the parents to educate the other members of the family. But they must first be educated themselves, and not all parents are. I was glad when you told them to write to the National Association for Mental Retardation for literature, because that's exactly what my folks did.

I have presented numerous reports on this subject at school and have taught my classmates a lot. Mental retardation, like epilepsy and other brain disorders, is just now emerging from ages of ignorance. The only weapon against ignorance is education. Thank you for helping Ann—NOT ASHAMED.

Dear Ann Landers: You are making the best of a situation. I am sure that you will be able to find a way to help your brother. I am sure that you will be able to find a way to help your brother.

Dear Ann Landers: The letter from "Mere Male" should be read by every young man who is a single guy. Try a marriage certificate. In my opinion it's the classic example of what the American has.

CROWN PRINCE GREET'S FIANCEE

Crown Prince Constantine of Greece greets his 17-year-old fiancée, Danish Princess Anne-Marie, on her arrival in Athens Sunday. She came from school in Switzerland to see King Paul of Greece who underwent emergency surgery last week for an ulcer. The 23-year-old Constantine was made regent of Greece for his ailing father. (AP Wirephoto)

WOMAN AGED 106 OFFERS OPINIONS

KNOXVILLE, Tenn. (AP)—Mrs. Agnes Fair turned 106 years old this month and came out against men going to the moon and women going into politics. Said Mrs. Fair, about the space race: "There's plenty of room on this earth for all of us and I can't see the need of sending a man to the moon."

They Converse By Dit-Dah-Dit Code

NANAIMO, B.C. (CP)—When Edna Southworth tells her husband to keep in touch as he sets out for a seven-week stay at sea, she's not engaging in idle chatter. But for the moment it's a dit-dah-dit conversation. During the last year Mrs. Southworth has acquired an amateur radio licence at night school. She was the only woman in a class of 15 and passed a gruelling four-hour examination with good marks. But she faces another 10 months of study before qualifying for voice communication. In the meantime she uses Morse code to talk to husband Peter when he's aboard the weather ship Stonetown at Station Papa, 800 miles out in the Pacific.

NOVELTY FLORIDA ORANGE BREAD

3 Florida Oranges
1 c. sugar
1 c. water
1 tsp. butter or margarine
1 c. orange juice
1 egg
2 1/2 c. sifted flour
2 tsp. baking powder
1/2 tsp. baking soda
1/2 tsp. salt
Wash oranges. Remove thin rind with sharp knife; cut it into slivers with scissors. (Slice and use orange pulp in fruit cup).
Combine sugar and water. Add rind and cook-stir until sugar melts. Simmer 3 min. and measure. There should be 2 1/2 cups. Pour this into a bowl; add butter and orange juice. Beat and add egg.
Into a mixing bowl sift flour, baking powder, soda and salt. Add orange mixture; stir just enough to moisten ingredients; do not beat. Batter should be somewhat lumpy.
Transfer to oiled loaf pan 9x5x3 and bake 1 1/2 hrs. in slow oven, 325 degrees F., or until pick inserted in center comes out clean.
Cool on cake rack. Wrap in aluminum foil and refrigerate to ripen flavors. Serve the next day.

THE CHIEF'S BANANA TRIFLE AND VARIATIONS

Make 1 recipe Soft Cooked Custard and chill.
In glass serving bowl arrange alternate layers of sliced day-old plain, sponge or angel cake and sliced brown-flecked bananas. Pour over custard. Chill 3 hrs.
Garnish: sliced bananas.
Variations: Instead of bananas use drained canned fruit cocktail; apple-raisin sauce; canned sliced peaches; drained canned apricots and orange sections; canned mandarin orange sections and diced tenderized figs; sliced peeled pasteurized dates with halved orange sections and seeded grapes.

WARM WEATHER BRINGS OUT RUNNERS

Some 35 students from the Vernon Preparatory School are shown taking advantage of the recent warm weather to carry out their regular twice-weekly four-mile run as part of their physical fitness program. These students also participate in most other sports in season, such as basketball, volleyball, badminton and boxing. (Courier Photo)

Biggest Kill of Bighorn Recorded During 1963

VERNON (Staff)—Hunters in Spalding, "from this it appears that since 1961 the kill per hunter has remained quite constant, at one bird to one hunter. In addition to kill per hunter we also collected information on the ratio of young and old birds."

He indicated that another source of information on pheasant is the hunter sample, which indicates the total pheasant kill and the kill in the Vernon area has apparently shown a slight increase since 1959. Comparative figures show that in 1959 approximately 5,000 birds were killed; in 1960—6,000; in 1961—5,900; 1962—6,400.

To gather information on pheasant numbers and mortality throughout the rest of the year, we have initiated a series of counts in the Valley," said Mr. Spalding. "The first of these was made during early January when a count of 636 birds indicated a ratio of one male to nine females, in some areas there were as many as 13 females to one male. However, the second count early in February, with 790 birds counted, indicated a different picture, one male to eight females, and in the Cuddstream area we found more males and the ratio was one to seven."

Boy Scouts And Cubs Hosts For Fathers At Banquet

ARMSTRONG (Correspondent)—A successful father and son banquet of the Armstrong Boy Scout Association was held recently in the Royal Canadian Legion Hall, Armstrong.

Some 115 guests attended the annual affair, which took the form of a turkey dinner, prepared and served by a mothers' committee convened by Mrs. Earl Corley. The blessing was invoked by Rev. J. R. Hague, chaplain for the association.

Head-table guests included district commissioner William Fulton, district Cubmaster Kay Bartholomew, and assistant district Cubmaster Robert Richards, all of Vernon; also Mayor Jack M. Jamieson, Armstrong; Councillor Peter Buyer representing the Municipality of Spalding; Mrs. Ralph Lockhart, representing the parents' group; Girl Guides committee; John Fowler, president of Branch 35, Royal Canadian Legion, Armstrong; sponsor of the Scouts and Cubs—Hugh Wardrop representing the recreation commission, and Cpl. C. J. Dent of the RCMP, Salmon Arm, former Cubmaster at Armstrong; guest speaker Earl Carlson, of Vernon; trustee Mrs. Charles French of the school board; Gordon Schnare, chairman of the group committee, and Mrs. G. A. Mudry, secretary of the group.

Mr. Schnare proposed a toast to the Queen, while Don Levey, high school teacher, toasted the memory of Lord Baden-Powell, founder of the Boy Scout movement.

Mr. Schnare reviewed the past year's activities, including a successful apple tag day and bottle drive. The boys had also assisted at the Arabian encampment, selling programs. They participated also in the Vernon Winter Carnival. Mr. Schnare told the meeting that with 40 boys in the Cub pack, more leaders are still needed.

CNIB To Meet In Health Centre

VERNON (Staff)—The annual general meeting of the Canadian National Institute for the blind will be held in the Centennial Health Centre, March 10, at 8 p.m.

Field secretary Clarence Hombing will be on hand to demonstrate the new talking book machine and a film "The Smartest Kid in Town," will be shown. Annual reports and election of officers will also take place.

NOT SO LUCKY WITH ATTENDANCE

VERNON (Staff)—Vernon Luckies' senior baseball team is looking for a new executive.

But they weren't able to decide on one at Thursday night's annual general meeting and election of officers. Only three persons, besides several players, turned out for the meeting which was eventually postponed to next Tuesday evening. A time and place will be made known later.

At Thursday's meeting the names of 18 potential persons who might serve on the executive were presented to general manager Vern Dye. He will contact these persons individually between now and next Tuesday.

Peewee Teams Each Take Lead

VERNON (Staff)—The Redwings, Totems, Canadians, each took a one-game lead in their best two-out-of-three games in the semi-finals of the Peewee division.

The Red Wings blanked the Black Hawks 2-0 on goals by Bob Karen and David Ogawara. Mike Douglas recorded the shut-out for the Wings.

In the 6 p.m. game the Totems downed the Panthers 3-1 on goals by Gary Turk with a single and Doug Wiffen with a pair. Lorie Udell scored the lone Panther goal.

In the 7 p.m. game the Canadians downed the Maple Leafs 4-1. Fred Wilson, John Carignan, Wayne Nuyens and Vic Passmore each scored singles for the Canadians. Doug Dirk scored the lone leaf goal.

GAMES TO BE PLAYED:
Saturday, 8 a.m.—Warriors vs Stampede; 9 a.m. rep. team practice.
March 1—12 noon—Vernon All Stars travel to Summerland for their first game in the best-of-three Okanagan Valley semi-finals. The second game will be played in Vernon at 10 a.m.

Load Curbs For Trucks

VERNON (Staff)—Truckers in the North Okanagan electoral district are reminded the annual load restrictions for 1964 will be enforced starting this Saturday.

W. G. Helmsing of Vernon, district superintendent of provincial highways, announced today that pursuant to section 109 of the Motor Vehicle Act, and section 27 of the Highway Act, load restrictions are hereby applied on all provincial highways and roads within the North Okanagan Electoral District as follows.

Effective 12:01 a.m. Feb. 29, 50 per cent of gross vehicle and axle loading on all provincial roads except the following: Okanagan Highway 97, 97A, 97B and Vernon-Slocan Highway No. 6, which will be 75 per cent of gross vehicle and axle loading, or to further restrictions as they are applied to each road.

The I.X factor will be disregarded, said Mr. Helmsing, and vehicles with solid tires are prohibited from using the highways.

RIDERS MEET
ARMSTRONG (Correspondent)—The Armstrong-Enderby Riding Club will hold a special meeting at 7 p.m., Feb. 29, for anyone 16 years of age or under, who is interested in becoming a member of the club.

The meeting, to be held for interested parties from both Armstrong and Enderby, will be held in the old Dolph Browne building in Armstrong.

Speedy Drivers To Pay Fines Ordered In Vernon's Court

VERNON (Staff)—Three persons appeared in Vernon magistrate's court Thursday charged with operating a motor vehicle in excess of the posted speed limit.

Douglas Peterman, Philip Zavaglia and Joseph Merynski, all of Vernon, pleaded guilty to the charge and were each fined \$25 and costs, or in default 21 days.

Crown prosecutor RCMP Const. Stanley Partridge, told the court Peterman was charged after being clocked at 44 mph in a 30 mph zone on highway near Leavenworth. Zavaglia was charged after being clocked at 60 mph in a 40 mph zone on his motorcycle. The court also learned he was clocked in the city doing 50 mph in a 30 mph zone. Merynski was clocked doing 40 mph in a 30 mph zone. Both Peterman and Merynski had their drivers' licenses endorsed, and Zavaglia had his suspended for a recent period of two months.

Leslie Isaac of Vernon pleaded guilty to operating a motor vehicle without a valid driver's license and was fined \$25 and costs, or in default 21 days. Robert Quinn, of Vernon pleaded guilty to passing over a double solid line and was fined \$25 and costs, or in default 21 days. His driver's license was endorsed.

In passing sentence Magistrate Frank Smith told the accused: "I won't stand for any nonsense at all from you young men doing 50 mph in a 30 mph zone. You either obey the law or take what you get."

BEDROOM WING KEPT SEPARATE

This bungalow by architect Jacques Viret of the Dorchester, Quebec, has four bedrooms, two bathrooms. The bedroom wing is well separated from the rest of the house, and has large closets, particularly off the bedroom hall and entrance hall. A screened flagstone porch provides a covered walk between

the kitchen door and the garage. The dining room, which can be shut off from the living room by a wood accordion door, overlooks the rear garden, the living room window, which is over 18 feet long, overlooks the street. The basement is partitioned in four areas. Two of these are laundry and furnace rooms. The remaining two are unusually large, one intended as a

Long - Living Plumbing Needs Extra Attention

New plumbing fixtures are designed for long life with minimum care, but extra attention is needed to prevent problems. Here are some tips on proper care of fixtures:

- Don't use bathtub, basin or sink as catchalls for paint cans, trash, or tools when redecorating.
- Never step in a bathtub with your shoes on.
- All household cleaners are mildly abrasive, so use them moderately, and with lots of water.
- Don't bang metal utensils around in the sink; they're apt to scratch or chip it.
- Don't use home basins as receptacles for photographic developing solutions or other chemical concoctions. They will leave permanent stains.
- For simple stains (dirt, grease or minerals in the water) scrub up with a bar of mild, neutral soap in a quart of hot water, and two tablespoons of paint thinner or dry-cleaning solvent. Apply with a stiff scrubbed brush.
- Hardened paint spots can be removed with a razor blade, but be careful not to scratch the surface of the sink or fixture. When most of the paint is scraped off, remove the rest with two: one dissolving fluid or an ordinary household cleaner and water.
- Rust which occurs mainly from leaving wet metal utensils in the sink, can be removed with a solution of one part muriatic acid to ten parts water. Wash

the surface of the fixture thoroughly before and after application. Use only on acid-resistant fixtures; don't let it come in contact with chrome plating, and wear rubber gloves! Abrasive and should be used only on acid-resistant fixtures. All modern kitchen sinks, vitreous china fixtures such as water closets and colored enamel or porcelain have acid-resistant qualities.

And stains, usually from food, may be removed with a paste of peroxide and equal parts of cream of tartar and household cleaner. Let the paste remain on the stain for ten to fifteen minutes before washing off.

HELPFUL HINTS ABOUT YOUR HOME

HINTS TO HOMEOWNERS

Rain Keeps Washing Down Unwanted Paint Onto Brick

PAINT ON BRICK

QUESTION: We live in a two-story home. Bottom is red brick and the upper part is wood-paneled. How can I wash the brick from the paint washing down on it? With every rain it washes down further.

ANSWER: Use a prepared paint remover available at paint and hardware stores. Following directions exactly. If the paint is deeply embedded, complete removal may be very difficult. Some paint and masonry dealers carry excellent masonry cleaning preparations. Well worth investigating to prevent further staining of the house paint. (Paints give the brick a coat of transparent liquid waterproofing, available at masonry supply dealers and lumber yards.)

WATER-SPOTTED SHOWER

QUESTION: Our shower is painted the walls. How can I remove the water spots all over the tiles?

ANSWER: Wipe the tiles with a paste made of powdered white tile and acetone, allowing to remain a few minutes. Then rinse with warm water and wiping dry. Be sure the bottom room is well-ventilated while working, and be careful of the fire hazard.

TILING OVER ASPHALT TILE

QUESTION: In the kitchen of my home is a floor of asphalt tile. I would like to cover with a lighter tile because the light is quite small. The tile is pasted on a cement floor. Must the old tile be removed? It would be quite a project to remove the tile now down.

ANSWER: Floor covering dealers generally do not recommend putting down one floor covering over another for the excellent reasons that if anything happens to the adhesive on the bottom layer, the top layer will also be affected. However, if the present tile adheres tightly and is absolutely smooth, many others do successfully suggest consulting your tile dealer and getting his recommendation on your particular floor.

MOSS ON PATIO CORNER

QUESTION: Moss develops on the flagstones in a shady corner of our patio. It looks unsightly and is hazardous because it is slippery. What do you recommend?

ANSWER: If shrubbery, or trees, could be thinned here, to permit more sun, it would help prevent the moss. To remove the moss, scrub with a stiff brush and household bleach. Allow to remain four to five minutes, then wipe up with a damp sponge, rather than liberal rinsing with water, to avoid leaching on your particular lawn to nearby roots. Pull floor.

A Notable Thirst Gains Its Reward

BIRMINGHAM (AP) — Harriet E. Brooks, who estimates she has drunk two quarts of beer a day since she was 18, will receive free beer the rest of her life. The reward has been made by a brewery in Birmingham, England, after she proved to the public satisfaction that she had drunk 200 barrels of its beer. Mrs. Brooks is 91.

FIRST AID TO AILING HOMES

GREASY KITCHEN DRAWERS

QUESTION: We are cleaning our flat and some kitchen drawers have very greasy side and front boards on the inside, from greasy hands. How can we get this out?

ANSWER: Try cleaning with a cream, clean-up wax made by a nationally known manufacturer, available at supermarkets, housewares and hardware stores; follow label directions.

Or cover greasy surfaces with thick paste made of powdered whiting or other absorbent powder and a nonflammable liquid spot remover, covering with thin plastic to retard evaporation. The spot remover acts as a solvent on the grease and the absorbent powder like a blotter to draw it out.

YELLOWED VINYL WALL

QUESTION: We have white vinyl wall covering on the kitchen walls. After three years, it has yellowed. Is there any cleaning method we could use to get it white again?

ANSWER: Wash with a warm detergent or mild soap solution, followed by ample rinsing with clear water to remove all trace of cleaner; start at the bottom of the walls and work upward to avoid streaking. A cream, clean-up wax, made by a nationally known manufacturer, is frequently effective on this type of surface; besides removing the grease and film on the wall surface, it leaves a protective coating against future staining.

VIEWS ON SPORTING NEWS

by BILL STAATS

Although the words "I'm the greatest" and "I'm the best" are already becoming faint echoes in the history of championship boxing, two groups have been heard.

They are "Black Muslims" and "Islamic subcommittee investigations."

Taking the former, first-time leader of the Black Muslim or Islamic religion has proclaimed that Cassius Clay was the heavyweight title because he is a Muslim himself.

The self-proclaimed leader, Elie Muhammad, said Thursday he was glad Clay was brave enough to say he was a Muslim. Clay didn't say any such thing.

However, later in the day, Clay professed being a member of the Islamic religion and said he regarded it as the best way to bring peace among the peoples of the world.

The group's beliefs appear to be anything but peaceful. Muhammad has spoken discouragingly against the Black Muslims' integrating into white society and says one day the Negroes will triumph over the whites.

No matter how we look at it, this would be done peacefully.

Surprisingly, Muhammad didn't have any great words for Cassius until the time he took the world title and commenting on the fight said, "While people wanted to beat up and probably kill poor little Clay, he got to win the fight."

Anyone interested in the future of heavyweight boxing and the sport in general knew this would be the worst thing that could happen.

Almost everyone expected him to give the lip a far beating, inside three rounds. This was predicted, so he said they wanted to see Clay whipped.

But Muhammad has put the Black Muslim group on the front cover more. Too bad it had to be while they were riding a band wagon. Even band wagons get old.

The Senate subcommittee investigation will hold a short set of hearings into the rumored deal that Clay and promoter-promoters had for \$500,000 to International Promotions Inc. Sunday night. It's a fight between the executive.

The question is why the heavyweight champion didn't agree to promote the challenger's next fight, before the championship fight took place.

For the same reason, why do you take out a life insurance policy? You don't expect to die tomorrow or next week but it will happen. The fact that someone drives over you on the street the next day doesn't mean it was planned, or there was anything fishy.

On the other hand, the promoters of Clay's next fight won't have to spend so much money for publicity agents. The new world champion makes up for it in 10 minutes.

It was a plain smart business deal. Someone will tell "It" did the smartest thing but that would leave several dozen men standing out of work and there's no doubt, they aren't going to let the band that feels this.

Hawks, Rangers Triumph 4-2 First Place Still Deadlocked

By THE CANADIAN PRESS

They say the trick to scoring in the National Hockey League and helped set up two goals in getting off that shot with powerplay the Rangers to a 4-2 minimum of fans and players.

Give a goaltender an unimpeded line of vision and he'll be able to set himself and he'll be able to anticipate you right out of the league.

It's the streaky ones that give him trouble.

But a couple of fellows can count on sheer velocity in their shooting and one of them is Bobby Hull, the blonde kid with all the rippling muscles and Grecian profile.

He scored his 37th goal of the season on one such typical effort Thursday night and his Chicago Blackhawks bounded back into a share of first place in the standings with a 4-2 win over Detroit Red Wings, a club on a hot streak up to that point.

New York's Harry Howell, never known as a wizard on the attack, meanwhile scored once in the National Hockey League and helped set up two goals in getting off that shot with powerplay the Rangers to a 4-2 minimum of fans and players.

THAT IS WHERE IT SMARTS

Dr. Robert C. Bennett explains the injury suffered by Ladd as he lost his heavy weight title in Miami Tuesday. Ladd said he hurt the arm in the first round and was unable to continue after the sixth round. (AP Wirephoto)

Blonde RSM Moulds Kids Into Smooth Skating Show

For the last six weeks more than 200 Kelowna and district children have been under the tutelage of a blonde-eyed blonde who looks like she stepped out of a beauty advertisement, but who teaches a regimental regiment of skaters.

Saturday, Miss Elsie Busch, who staged her second ice carnival in the Kelowna and district skating arena.

DYNAMO — Watching this fine lot of 800 skaters, Miss Busch, who is a former figure skater, said she was proud of the children who were taking part in the skating show.

MISS ELSIE BUSCH

"After the music is selected and taped, the choreography must be worked out for each piece of music."

"Then we pick the colors for the costumes and buy the necessary lighting."

MOTHERS — "We couldn't put on a carnival without the help of the children's mothers," said Miss Busch.

"Each group has a mother in charge of dress, she makes a model costume and the other mothers follow that pattern. They provide the material and the work too."

"When we have a mother who doesn't sew or who just hasn't time to make up a costume, they send it to the dressmaker."

All the hats, this year are being made by Bill Jennings.

HAT MAKER — "He has been one of the hardest workers of all," she said. "He has been around nearly every day. They are mostly made out of cardboard and crepe paper, with paper flowers, pieces of broken mirrors, sequins and glitter. The ones I have seen are just magnificent."

"He has been at it since Feb."

SESSIONS — Regular skating sessions are held for carnival rehearsal from 4 to 9 p.m. Mondays, from 4 to 7 p.m. Tuesdays and from 4 to 6 p.m. Thursdays.

Soloists and those preparing for tests practice from 6 to 8 a.m. daily.

Miss Busch goes to Vernon on Wednesday and Fridays to instruct private lessons for senior skaters there. Two of them will also take part in this year's carnival.

The planning for the carnival starts some two and a half months before the date, with picking the theme, deciding the number of junior and senior group numbers and picking and taping the music.

"We are limited in the theme selection, for we must make it different and we must pick something we can use younger skaters in. At the same time you have to give sufficient thought to those members of the club who are junior and senior precision skaters."

THEME — "This year the theme is an English country garden."

"The music too, takes a good deal of time. When the final work is done we will have taped and re-taped it five times. There is approximately 90 minutes of music in the two and a half hour show this year, in addition to the numbers skated by visitors."

National Crown For Hansen Rink

EDMONTON (CP) — Despite an anticlimactic last-round defeat, Ina Hansen's Kimberley B.C. rink resigned today for the second time in three years as Canadian women's curling champions.

With the title safely locked away as a result of a 15-6 victory over Manitoba earlier in the day, the new champions sat back and waited for the final round match. Ina Hansen's rink, which had won the title in 1971, was defeated 15-6 by the New Brunswick rink.

Still to be resolved today was a second-place tie between Alberta and Nova Scotia, which was to be decided in a playoff after both finished the round robin competition with six victories and three defeats. Two games behind British Columbia were Ontario and Quebec.

Manitoba, Saskatchewan and Ontario were tied with two losses in the round robin. Ina Hansen's rink, which had won the title in 1971, was defeated 15-6 by the New Brunswick rink.

Alberta and Nova Scotia both had chances to win second place without a playoff by splitting their games Thursday.

Mantle Sets Out Ambitions; Signs '64 Contract—\$100,000

FORT LAUDERDALE, Fla. (AP) — Mickey Mantle's ambitions were set out today in a 1964 contract to play for the Yankees and to hit .300 or better in 150 games this year and to hit .300 or better in 150 games this year and to hit .300 or better in 150 games this year.

New York Yankees, who announced Thursday that Mantle had signed a \$100,000 contract, said they have a few more objectives in mind.

Yet the multi-purpose centre fielder's ambitions are less striking than they seem. He's played baseball for 150 games.

"We just hope the leader doesn't come down with a cold the day of the carnival," she said.

"But the children have fun, the mothers are wonderful, and in the end it is all worth it," said Miss Busch.

HELP MINOR BALL WITH CAR WASH

All of us would like to contribute something toward the minor sports programs in Kelowna but for most, it is a bit tough, time-wise at least.

However, now you have a chance to do something not only for minor baseball, but also for your car.

The three Connie Mack baseball teams from Kelowna will be holding separate car washes at three sites in the city.

The washes will be held at Capitol Royale, the Safeway parking lot and the Parkway Royale on Harvey Ave. at 10 a.m.

The cost is a nominal 99 cents and cars will be washed as long as they arrive at any of the three centres.

This is your way of aiding baseball in Kelowna, and these boys do an excellent job.

New Measures Put Into Effect To Beat Sleepy Sickness Threat

TRAIL, B.C. (CP)—A nine-month campaign to determine which form of the year-old boy who may continue to suffer from the disease is suffering from it. Results will not be available until the end of the year.

At the same time, provincial health officials ordered a series of wide vaccination of horses as a preventative measure.

Dr. James McAnulty, medical health officer here, said that while the disease is not a threat to humans, it is a threat to horses and cattle. "It is a sort of a dead end unless another human being is infected," he said.

He said the boy's disease is similar to the sleeping sickness that killed a number of persons and horses in Alberta and Saskatchewan last year.

The virus attacked the brain and spinal cord. The victim may recover, die or be left in a state anywhere in between.

Agriculture Minister Frank Rutherford said a horse that died of the disease in the Kootenay region last year may have come from the Prairies.

He said the vaccination program should be completed before the insects that carry the disease begin breeding in late March. Dr. McAnulty said his investigations have shown flocks of wild birds feeding on a sewage sewage lagoon in the area and that these birds may be the source of the disease.

YOUR HOROSCOPE

FOR TOMORROW

Energy and ambition will be so highly stimulated now that you may have to make a tremendous effort to control your impatience and irritation over delays caused by those who seem to stand in your way. If you will use diplomacy instead of argument, however, you will find that everything will run more smoothly.

FOR THE BIRTHDAY

If tomorrow is your birthday, the year ahead should find you in line for sudden promotion, change of environment and new interests—all leading to achievement beyond your fondest hopes. It will be a year when tremendous opportunities will be offered, seemingly "out of the blue"—opportunities calling for direct and decisive action. Where finance is concerned, the best periods will be: mid-June, mid-August, late November and early December; business or career expansion: July, October and December.

Where personal relationships are concerned, the next 12 months will also be governed by excellent influences. Best periods for romance: late this month, late August and mid-December. Travel and social interests will be favored in July, November and December. Do avoid extravagance in mid-July and in mid-September, however. A child born on this day will enjoy the favor of those in high places and could make a great success out of creative pursuits.

GOLDEN HAWKS BIG ATTRACTION LAST SUMMER

The famed Golden Hawks of the RCAF were one of the most exciting attractions to appear in Kelowna during 1962. The group has since been disbanded and will fly no more. During August they

spent four days based at Kelowna airport and flew shows in other parts of B.C. from that site. During the junior Regatta they were the featured attraction. Besides the seven solid gold Sabres, the

Red Knight was also in attendance with his flaming red T-33 Silver Star jet and an airforce helicopter also strutted its stuff before the packed Ogopogo Stadium on Kelowna's waterfront.

(Courier Photo).

legislation throughout Canada and should confine itself to the existing flat-rate pension with the possible addition of disability and survivors' benefits, and also that provincial chambers of Commerce should urge their legislatures to co-operate with the other provinces in enacting uniform pension legislation.

Metric system: The declaration was adopted calling for Canadian industry, Government and education institutions, particularly in their design and research fields, to encourage wherever practical the wider use of the metric system and promoting programs towards the increasing adoption of this system in Canada.

Relations with Latin America: The recommendation under this heading was amended to request the Federal Government to undertake a thorough study of the implications and probable consequences of membership in the Organization of American States.

ELECTION

Canada Elections Act: That it be amended to provide the political party affiliation of each candidate after the candidate's name on the ballot and that the Act be further amended by requiring the manner in which the ballot is marked.

These are just a few of the resolutions and policies of the Canadian Chamber which our Kelowna chamber are asked to review and state their stand. Thus the chamber works towards a better government at every level from the community to provincial to national affairs.

'63 Power Load Up At Westbank

WESTBANK—Steady growth of the westside area during the past year is shown by the increase in kilowatt load of more than 15 per cent; hydro manager V. E. Norman reports customer load is up by 80 new users for the same period.

Late last fall the office was moved to Main street, from its original location on a back street, and the new attractive quarters are a decided advantage for customers as well as staff.

The late Harry Grant, of Vernon, installed Westbank's first electrical plant 25 years ago, serving a part of the area. Mr. Grant was bought out by T. B. Reece and finally B.C. Hydro took over the installation and extended services to the entire area from Bear Creek south.

that the Federal Government should co-operate with the provinces in standardizing pensions

Kelowna C of C Membership 414

By MRS. TERRY UTLEY
of The Daily Courier Staff

The Chamber of Commerce began in Kelowna out of a meeting of 23 businessmen in 1908. D. W. Sutherland was appointed chairman and George C. Rose, publisher of the Courier, as secretary. In 1963 membership reached 414.

The aim of any Chamber of Commerce is community betterment and the creating of a better business climate. The Kelowna chamber has furthered industrial and agricultural life in our city and worked for the advancement of city and district interests in all matters. Their record over the years shows how they have worked for the improvement of transportation and communication facilities.

BRIDGE

Years ago they tried to improve schedules on the CPR steamers, then on the train timetables and later on ferry service. Transportation achievements reached their peak with the opening of the Okanagan Lake bridge July 19, 1958.

The chamber played an important part in promoting the Hope-Princeton, the Trans-Canada and the Cariboo highways, and the Ellison Air base.

Since agriculture, and particularly horticulture, is the leading industry in this area, the members of the Chamber have for many years recognized their responsibility to this sector of the community and have assisted in every way possible to further the interests of agriculture.

It was the chamber years ago who founded Trade Holdings Ltd., which was responsible for making Kelowna the centre of the fruit industry.

POLICY

In 1963 the Chamber played an important part in having the General Policy Statement of the Canadian Chamber of Commerce changed to recognize the principle of organized marketing of agricultural products. The Kelowna chamber sponsored the 44th achievement banquet and donated prizes annually. They promoted the use of pasteurized milk in this area and promoted the use of milk produced in the interior.

What does a Chamber of Commerce mean? It has a different meaning for different people. To the car owner it may mean improved traffic and parking facilities; to the old age pensioner improved pension schemes; to the tourist good information centres, a pleasing city appearance from flower tubs to tree planting.

To schools and school teachers the Chamber is the link between business and professional men and educational authorities. They co-ordinate efforts with school authorities to foster and promote a sound and practical educational system for the democratic way of life with students.

COLLEGE

In 1963 the Kelowna chamber supported efforts for a community college. They encourage use of the Vocational school.

The Chamber of Commerce is the unified voice of businessmen in the community. They follow municipal and public affairs

closely taking action when necessary to change or amend what is not as beneficial to the area as it could be.

In the past year the Chamber worked closely with city council discussing possible works under Municipal development; downtown parking and traffic congestion on Harvey; approved arena and Queenway parking and supported the location of the Federal building.

Everything the Chamber accomplishes affects the businessman.

WAREHOUSE

In the past year the chamber was instrumental in getting a bonded warehouse in Kelowna and increasing the custom staff to two persons. They purchased, with the city, 1,000 copies of the 1962 economic survey and distributed them. Individuals wishing to establish new business firms here meet with the chambers' industrial committee for help. The chamber is ever publicizing the city and in 1963 60 boxes of apples were distributed at the football game in Calgary. A national magazine was supplied with material to feature this city in their February issue. This promoting has become such a project a separate committee has been set up called the Visitors and convention with a full time co-ordinator.

A special committee reviews public affairs and recommends the stand the chamber should take. In 1963 they contacted the Prime Minister and our member concerning pension schemes; they opposed the legislation on estate taxes and promoted voting in all elections.

The Chamber of Commerce supports all roads which will improve access to this city.

PAVING

During the past year they advocated the paving of the Beaverdell Carmi road which would also help Big White ski resort. They opposed Howse Pass highway feeling it would divert traffic from Rogers Pass; they promoted the Yellowhead roundabout; endorsed the Peachland-Princeton road; approved the Pentleton cut-off and the west side road along Okanagan Lake.

Working towards better town planning the chamber approved the establishment of a Central Okanagan planning board. They have also held onto Mission beach property for future development.

The chamber was represented on the Royal Commission on transportation (presenting a submission) and will be represented on the Provincial Government Rates committee in its implementation.

Some of the changes or additions made to national policy statements advocated by the Canadian Chamber of Commerce in 1962-63 include:

A new recommendation to the Unemployment Insurance declaration to the effect that the Gill Report be implemented immediately.

SECURITY
Old Age Security: This declaration was amended to set out two recommendations, namely

we're proud to say it's our ...

65th Year

... serving Kelowna and district families with
QUALITY MERCHANDISE

since 1899

From the beginning, it was the belief of the founder that a store that wanted to grow and prosper must serve its customers with the finest in all respects. By following the beliefs of selling quality merchandise, giving prompt, friendly service and the fairest prices, Geo. A. Meikle Ltd. has continued to climb the ladder of success.

Meikle's have always been known for a large stock of fashionable merchandise, a sales staff second to none and brand name garments, shoes and drygoods that are tops in quality. When you shop at Meikle's you can shop with confidence knowing that you are receiving the finest merchandise at the fairest price.

Kelowna Paint & Wallpaper Ltd.

Frank Beagle
Owner-Manager

Since purchasing Kelowna Paint & Wallpaper Ltd. in 1961, I have enjoyed serving the public of Kelowna.

I feel that the quality merchandise we sell, the professional decorating advice we give and the friendly services we render will continue to make more customers and friends enjoy shopping with us.

**You Can't Buy ...
CONFIDENCE!**

Our reputation and business has been built on families who return to us a second, third or more times ... their recommendation to friends and relatives is invaluable to us.

Your confidence, which is so essential to our future success can be obtained only by serving you well — by pricing our merchandise as low or lower than similar merchandise elsewhere and by guaranteeing everything we sell.

Preparations Started For New Student Influx

Kelowna during 1963 saw the completion and the opening of the B.C. Vocational School for the training of nearly 1,000 students in many trades.

During the year a college was forecast for the Okanagan and the likely site was Kelowna. During the year much work has gone on towards the establishment of this institution, but at year's end no decision had been made on its location or actually on whether it will ever be.

Across Canada those connected with higher learning are busily engaged in preparing for the future.

The Canadian Press, in a Cross-Canada Survey, added the cost of building programs at 32 universities and came up with a total of more than \$225,000,000 for the two decades ending in 1980.

And it's inevitable that new plans to be drawn up in coming years will boost the figure well over a billion dollars.

Campus expansion ranges from a comparatively modest \$500,000 outlay for a science building planned by St. Dunstan's University, Charlottetown, to a 20-year program costing about \$10,000,000 at York University, established in 1960 to serve Metropolitan Toronto.

There are about 136,000 full-time students in institutions of higher learning in Canada this year and the number is rising about 10 per cent a year.

At the end of three phases of a six-operated system as Carleton completed and the opening of a 16-story social sciences building will cost \$4,000,000.

The University of Saskatchewan's Saskatoon campus is putting up a \$1,700,000 food services building that can accommodate more than 3,000 students. The Regina campus is constructing \$7,300,000 worth of buildings in three connecting units.

Ryerson Polytechnical Institute recently occupied a new \$15,000,000 building in Toronto that includes a special lab for handling radioactive materials and elaborate facilities for teaching radio and TV skills.

Laurentian University, Sudbury, Ont., is working on the first phase of a \$15,000,000 program, including permanent quarters for the federated colleges of the Roman Catholic University of Sudbury, the United Church's Huntington College and the Anglican Theological College.

Hindu-Muslim Peace Sought

BOMBAY (CP) — While the governments of India and Pakistan have failed to agree on joint measures to end religious violence, a nationwide non-official campaign is under way here to promote Hindu-Muslim understanding.

Political workers, mill laborers, students, housewives, film stars and authors have organized a drive to end the hatreds and suspicions which culminated in the recent orgy of killing in Dacca, capital of East Pakistan, and Calcutta, capital of the Indian province of West Bengal.

Responsible persons in both the countries think that governmental efforts to end the religious tensions have to be backed by non-official action directed at convincing minorities in the two countries that the minorities are not thinking of eliminating them.

Every day, both morning and evening giant "peace" marches are organized in Calcutta. One such procession led by Chief Minister Sen and other West Bengal officials, consisted of 30,000 Hindus, Muslims and Christians.

All the political parties in Calcutta have drawn up a code of conduct for their members. They have suspended political warfare until all Muslims who left their homes during the recent riots have been rehabilitated.

Two million leaflets carrying Prime Minister Nehru's appeal for understanding between the two communities have been distributed and another 500,000 are being printed.

CITY HALL EXTERIOR RE-PAINTED WHITE

Kelowna's pure white city hall received a new coat of paint during 1963 to make it just that much more attractive within the large lawn and surrounded by flourishing flower beds. During the year also, many changes in accommodation were made inside the building with many small modernizing touches added to the front office area. A new coffee room for staff members was built on the top floor and a new switchboard was installed, to give many more lines, both in and out. (Courier Photo.)

Bridge Toll Removal Said Economic Stimulant

By PETER MUNOZ
City Editor
Of The Daily Courier

The economic face of Kelowna and its district was changed a number of ways in 1963, but the removal of tolls from Okanagan Lake bridge had the greatest impact.

Commerce, within the immediate area, and along the whole of B.C.'s highways took a new direction.

Formerly it cost 50 cents for a one-way passage of a motor car over the bridge, and many dollars for each truck. Now people pass to and fro, at no cost, and without having to stop at the gates.

At 11 a.m. April 1, 1963, Premier W. A. C. Bennett officially proclaimed the Okanagan Lake bridge at Kelowna free from toll charges. In actual fact the toll was removed at 12:01 a.m. the same day.

More than 300 people including invited guests attended the brief ceremony held at the west approach to the bridge. The bridge, described as impossible to build, had its beginning officially on November 17, 1955 when word was received from the Premier that the first tenders had been called for its construction.

The bridge was completed by July 1958 and Princess Margaret cut the ribbon and declared the bridge officially open at 12:27 p.m. July 19, 1958. An estimated 800 spectators, including 500 invited guests from all over B.C. and the U.S.A. witnessed this ceremony.

The two-lane structure was a \$7,500,000 project, with a span of 4,855 feet over the water and an overall length of 24 miles, complete with lift span.

"We should give thanks to the Okanagan Valley, its people and its resources that made the building of this bridge possible," said Premier Bennett at the toll removal ceremony.

IMPORTANT

"This is indeed an important day in the history of the province," he said.

"We must specially thank the west side Indian Council and its native sons. If it had not been for these people," the premier said, "this bridge would not have been built."

Kelowna's Mayor R. F. Parkin said the economy of the Valley had amazingly leaped forward since the bridge was opened. He said despite plenty of opposition when we wanted this bridge built, we were successful in proving its worth.

Guests at the April 1 ceremony included: Hon. F. X. Richter, Hon. L. H. Shantz, Mr. and Mrs. Ted Derickson and Norman Lindley, of the Westbank Indian Council; Acting Mayor J. E. Palmer, Vernon; Acting Mayor G. E. Lang, Penticton; W. E. Jelcoat, M.L.A., Salmon Arm; Reeve C. O. Whinton, Peachland; C. E. R. Bazzett, chairman of original bridge committee; T. C. McLaughlin, president, Kelowna Chamber of Commerce; R. H. Drought, president, Westbank Chamber of Commerce and D. A. Chapman, president, Canadian Transport Association.

McGill is currently in the second phase of a \$10,000,000 program to be completed next year, is finishing a \$900,000 biomedical library designed to house more than 40,000 volumes initially and 100,000 eventually.

One of two new wings to the education building will have facilities for producing television programs for closed circuit transmission to two Vancouver schools.

At Queen's University, Kingston, Ont., closed circuit television enabling one professor to supervise 75 laboratory classes will be a feature of a \$2,900,000 teaching and research centre for biology opening this year.

A feature of the University of Victoria's new \$2,000,000 science building is an \$800,000 astrodome built in conjunction with an astronomy lab designed to house a 16-inch telescope.

The design of Carleton University's engineering building in Ottawa, due to be completed in May, is aimed to give students and campus visitors a visual interpretation of some of the principles of engineering. Much of the mechanical equipment and structure of the building will be visible.

QUALITY

Quality is the most evident part of Willits-Taylor Drugs Ltd. It's evident in the merchandise you buy, the service you receive, the prescriptions we so accurately fill. Willits-Taylor is conveniently located in the heart of downtown Kelowna . . . but we maintain a free, speedy delivery service for those times when it's not possible to do your shopping in person. Yes, the combination of Rexall and Willits-Taylor, maturing over a period of 50 years, spells a lot of quality . . . but it's overshadowed by one down-to-earth element . . . a friendly atmosphere.

Twenty-Five Years Of Growth Through Service

From its beginning in 1939, when small loans had to be turned down because of lack of funds, The Kelowna and District Credit Union celebrates a silver anniversary with a fine record of progress.

The year 1948 saw us with 154 members. Today, over 4,000 members enjoy friendly business relationships with the Credit Union, and the entire organization is backed by assets in excess of 1 1/4 million dollars.

" . . . Credit Unions contribute significantly to the growth and stability of a nation's economy. They foster and encourage thrift and regular saving, and they provide a means of putting these savings to further productive use. Savings and lending are essential elements of sound economic growth for any country, and these processes are especially important to the developing countries of the world. In cooperation with the Agency for International Development, and the Alliance for Progress, Credit Unions are being established in many countries. Credit Unions, through the principle of self help, will play an important role in the economic advancement of these countries."

(excerpt from a speech by John F. Kennedy, President of the United States, May, 1963.)

Become a member now . . . Get the details on all the benefits a Credit Union member enjoys. See Don McKay, Manager.

with high tides, smashed concrete seawall walls, flooded villages and sank a number of Arab sail boats. The inhabitants of the 200-square-mile island for the first time in living memory saw the forming

MAORI DEATH RATE

WELLINGTON, New Zealand (Reuters) — At an age up to 65 is the native Maori death rate less than twice the European. For females of adolescent and working years, the tribal rate

is three times that of Europeans. Susceptibility of the Maori to epidemic and communicable disease is well known, says a health department report.

B.C. Vocational School Opened In Kelowna In '63

By SUZANNE SWANSON
Of The Daily Courier Staff

September 30, 1962 the B.C. Vocational School in Kelowna opened its doors to perform the function for which it was built. Designed to accommodate 300 daytime students and an equal number of night students, it was not operating to its full capacity, but that would come in time.

The fact that entry applicants outnumbered acceptances is a sure indication the institution has been needed in the Okanagan.

FEDERAL-PROVINCIAL

The provincial government spent large sums of money on the school. According to a policy of equalization of vocational training opportunities, they felt neither financial resources nor place of residence should bar a person from training needs.

In conjunction with the Dec. 1, 1966 federal technical and vocational training bill, in which the federal government contributes toward provincial expenses, the new Kelowna school was opened at an initial cost in excess of \$2,000,000.

The scope of vocational education is exceedingly broad. It attempts to serve all types of students leaving our schools by guiding them into fields of employment suitable to their interests and opportunities.

It does not substitute for the education offered in secondary schools, rather it is to supplement and broaden the scope of

training opportunities for young people.

One of the problems confronting those responsible for establishing suitable training programs for the unemployed in Canada is the difficulty in helping the person who has left school at an early age and has not been able to increase his formal education and to obtain a skill suitable to the present day employment trend.

There is a decrease in the number of unskilled occupations and an increasing demand for higher skilled personnel. As industry gradually introduces automation to increase its production, lower its unit costs, and so stay in business, a person without training or work experience becomes more and more of a liability on the employment market.

The department of education has been aware of this problem and the result is the establishment of pre-vocational courses to train the person in a skill which will make him employable.

ECONOMIC ASSET

The school is an economic asset for Kelowna. It has been estimated some \$6,000 a month will be pumped into the economy through the room and board of students alone. In addition there is the employment of the staff, instructional and maintenance and the cost of various services and maintenance requirements. There is also the spending money of the

students in stores and restaurants.

The school is also a physical asset.

The department of public works played an important role in the design, construction, building and grounds of the school. They saw that construction was of the required standard and that work progressed on schedule.

The biggest single installation of modern communication equipment in the Okanagan telephone system is housed in the new school. The communication system was engineered to meet the needs of this modern training centre by the equipment supervisor, A. G. Dunner. Heart of the system is a 30 line private automatic branch exchange which provides fast, efficient communication to 43 telephones located throughout the complex.

CHIEF EXECUTIVE

Chief executive of the Kelowna Vocational School is W. H. Brown. He said the school is designed to handle two types of related instruction—pre-employment and pre-apprenticeship.

Pre-employment training is given to qualify the student for employment in a specific trade or vocation, whereas pre-apprenticeship trains the student sufficiently to enter a registered apprenticeship according to the regulations of the apprenticeship branch. Mr. Brown said these students after graduation from a class are ready

by the material an employer is looking for.

Courses include auto mechanics, auto body repair, heavy duty mechanics, commercial, practical nursing, welding, (mechanical) and machinery repair.

New Homes At Pridham

One of the residential developments progressing rapidly in the Kelowna area is the 110-acre Pridham Estates opened in 1961.

Rex Lupton, agent manager for the development said all the lots in the original area have been sold. An estimated 13 to 20 new houses ranging in price from \$15,000 to \$20,000 were built in 1962.

Pridham Estates Ltd. is bounded by Glenmore St. on the West, Birch Road on the east, the old Vernon Road on the south and Lawrence Ave. on the north.

A further development of 25 additional acres on high view land on the eastern section of the property is now being planned, Mr. Lupton said.

Ernest and David Schellenberg Jr. constructed two large apartment blocks in the Pridham subdivision in 1962. Each block contains 12 suites which are complete with stoves, fridges and other fixtures. Mr. Schellenberg said the estimated cost of this project complete with landscaping is about \$200,000.

ENCOURAGES FORCES

LONDON (CP) — American Ambassador David Bruce has offered a cup to the U.S. air force base in Britain that has done the most to foster good Anglo-American relations.

HAROLD R. LONG

The Interior's Largest Druggist And a Leading Member of the WESTERN DRUG Family!

L

O

N

G

Using foresight and imagination, Harold Long pioneered the "supermarket" technique in the Okanagan for merchandising drug products. Sensing the trend towards this method of retail selling would continue, he was a leading originator of the 44-member Western Drug Stores which joined together in 1963 to provide customers with greater selection at lower prices. One visit to any of the three Long Super Drugs in the Interior will convince you that the organization has been a success . . . you'll find the usual qualified prescription pharmacists but you'll find a great deal more, too: spacious display counters packed with countless items for the home and your family — and all at the lowest prices anywhere. That's the Progress Story of Long Super Drugs. Visit one soon!

OKANAGAN GROWERS VISIT ENGLAND

Special tours by air are becoming more and more prevalent and during 1963 one of the top out of the Okanagan was exhibited to the British Columbia Fruit Growers Association.

Mr. T. C. McLaughlin, a prominent grower who last year was elected president of the Kelowna Chapter of the Okanagan Fruit Growers Association, was one of the leaders of the British tour and is shown here, right, as he discusses facilities with an official at the East Malling experimental station in England.

Visitor Convention Committee Started In Kelowna Last April

The tourist bureau of Kelowna was dissolved Feb. 25, 1963 and in its place the Visitor and Convention Committee was formed April 10, 1963.

Representation on this committee was from city council, chamber of commerce, Jaycees, hotel, hotel, restaurant, automotive and retail.

R. K. Gordon took on full time duties as visitor and convention coordinator on June 15, 1963.

The visitor and convention committee operates with four sub-committees: service, education, entertainment and convention.

BOOTHS
The east approach visitor information booth was opened June 29, 1963 and operated 12 hours a day until Sept. 3, and nine hours daily until Sept. 15, on the Big Apple property.

The bridge approach information office was opened 12 hours per day from July to Sept. and then 6 days a week during regular business hours until Oct. 15.

Five extra men and one extra girl were hired to handle enquiries and extra office work. An added feature in 1963 was a reservation and booking service for both commercial and private accommodations.

In 1963 there were 11,803 visitor enquiries between June 1 and Sept. 15 almost double the 1958 figure of 5,678; Kelowna brochures distributed totalled 45,000; Kelowna maps 30,000; accommodation guides 15,000 and Jaycee maps 17,000.

The total number of personal enquiries received from Jan. 1, 1963 to December 31, 1963 was 13,634 compared to 10,328 in 1962. The estimated number of persons (based on 3 1/2 per vehicle) was 477,190 and an

estimated \$1,500,000. Results of the survey were:

TRAFFIC
Traffic on Harvey Ave. during the peak of the summer season was 6,944 vehicles as a daily average with 8,851 during the peak week. Based on bridge traffic count July 1 to August 29.

COPIES SENT
The visitor and convention committee in cooperation with the Kelowna Daily Courier sent a complimentary copy of this newspaper with the original reply to all written enquiries received.

Counter cards "We pay current premiums on U.S. funds" were distributed to all Kelowna retail outlets. Primary beneficiaries are urged to stamp cheques indicating these are tourist dollars. Several service clubs were addressed on the importance of tourism.

Place mats showing points of interest on a colorful map are being made available to Kelowna restaurants and cafes. This committee is working on a project to combine all billboard signs at city entrances to one well designed sign.

The primary function of the entertainment committee is to provide extended entertainment for visitors and encourage them to remain longer.

PARK SHOWS
At the suggestion of this committee the Jaycees produced evening entertainment in City Park five out of seven days of the week throughout July and

August. Public dancing was made available at the Aquatic every Tuesday. Other nights with the film showed showed better publicity and a good number of free films open to the public.

A second committee objective of these events was to attract and contribute to service stations, hotels, motels and others. A second objective was to attract and contribute to service stations, hotels, motels and others.

The Knights of Columbus were encouraged and assisted in improving visitor interest in the Kelowna Pantry Museum.

The committee has been working closely with the Okanagan Natatorium Society in an effort to have the provincial government construct a nature house, similar to the ones at Manning Park and Sicamous.

CONVENTIONS
The successful promotion of conventions is a long range project and must be sold and promoted to the public. Ideas in use or being planned include convention albums, slides, an animated portable convention display board, show card type signs, convention kits, post cards with the slogan "Your convention city" and facilities check lists.

All possible help in organizing and planning is supplied to clubs hosting conventions. This in getting more conventions committee stimulates interest held in Kelowna.

The expenditures of the visitor and convention bureau in 1963 amounted to \$10,781.

AUSSIE VOTERS
The number of persons eligible to vote in Australian national elections stands at 5,800, exclusive of the Australian Capital Territory and Northern Territory.

KELOWNA

records another year of steady progress...

MAYOR R. F. PARKINSON

It is my pleasure to be able to report, on behalf of the Aldermen and the Citizens of Kelowna, another 12 months of continued development in our City. We met the demands of industry, commerce and education in as sane and sensible a manner as was possible to ensure our continued growth without undue tax increases.

The problems which go hand-in-hand with the rapid progress of a City like Kelowna are many and varied and it is only through the unstinting co-operation of all citizens that it is possible to solve them. Fortunately, we have these kinds of people and with continued working together the future outlook remains encouraging. I know it is the wish of all of us that new people, new businesses and industries will continue to settle in our midst during 1964.

NEW AMBULANCE PRIDE OF FIRE DEPARTMENT

Pride of the Kelowna Fire Department is the new four-stretcher ambulance purchased and put into service late last summer. Kelowna

fire department is unique in a number of ways. There are few on permanent staff, only enough to drive the vehicles and administer the depart-

ment, the remainder of the 40 firemen being volunteers. The department also has a rescue unit of the first order and it runs the city ambulance service. For some time one half of the revenue from am-

bulance calls has been set aside for the purchase of new machines, so it is never a matter for budget discussion. The new ambulance is equipped with the latest in every department including two-way radio.

(Courtesy Photo)

New City Tire Service Shop Sets Up Impressive Building

Tostenac's Tire Service, on the corner of Doyle Ave. and Ellis St. is one more example of expanding business in Kelowna during the past year.

Carl Tostenac bought the land for his proposed tire service more than a year ago. It wasn't until last August though, that contractors moved the house occupying the land and began work. "Contractors did most of the work, but we all helped a little," he said.

The completed building includes a retread shop, salesroom and offices. Dec. 7 was the official opening of the store. The building is 130 feet long, 30 feet wide and 18 feet high.

SPECIALISTS
Mr. Tostenac said he specializes in new tire sales, retreads and home and auto supplies. Most of his work is done for Kelowna people although he has clients as far away as the Kootenays.

"We have an attractive corner and it's a main business artery," he said, in discussing his choice of location.

Mr. Tostenac was born in Kelowna. He served in the army overseas for five years during the second world war. He was in Italy, Africa, France and Germany. Since he left the army in 1946, he has been in the tire business. He lived in Vancouver before returning to Kelowna to open his tire business.

Mr. Tostenac is married and has four children, Mary, Karen, Ian and Craig. He is interested in boating, although he said, "I'm too busy working to have time for a hobby."

WORK DONE
At the shop, the tire is first inspected to determine if it can be retreaded. Then it is buffed to take off the old rubber, cemented and wrapped with a natural rubber compound. The tire is placed in a matrix, where it is heated and the tire pattern formed. It is cleaned and painted and is ready for sale.

There are four other employees in the shop. Gerry Robertson has been with the company two months. He was born in Kelowna but has worked in the woods and lived on the coast. He skis and plays baseball and football.

BORN HERE
John Culos was born and lived in Kelowna all his life. He was in the bakery business and

joined the tire company when it was opened. He is married and has two children. Mr. Culos referees hockey games in Kelowna.

Art Olson is from Saskatchewan. He has been in the tire business for five years and has owned his own shop. He plays golf. Mr. Olson is married and has three children.

John Sartees has been in the tire business for 15 years and with this company since it opened. Born in Kelowna, he has lived in Summerland, Vancouver Island and Kitimat. He moved back to Kelowna five years ago. He is married and has three children. Mr. Sartees likes to bowl in his spare time.

Mr. Tostenac said he has no plans at present for expansion. "But we always need more room," he said.

Hillary Prepares Peace Corp Plan

AUCKLAND, N.Z. (CP)—Sir Edmund Hillary, conqueror of Mount Everest, is hard at work preparing for a new advance in his personal peace corps program.

Since 1961 he has been engaged in a remarkable effort to aid the Sherpas, hill people of the region of Nepal near the base of Everest and high-altitude porters for most of the epic Himalayan climbs.

Enjoying an unusual sojourn at his home here, Sir Edmund is busy with preparations for a new Himalayan journey late this year. Once again, as last year, the chance of attempts on virgin peaks will be held out as bait to a party of selected mountaineers, but they will have to earn their passage by a lot of hard work on Hillary's program for the Sherpas.

Such expeditions have become the pattern of Hillary trips to the Himalayas—a multiplicity of activities to help the Sherpas with the lure of Himalayan climbing under the eye of a master as reward.

STAFF SCHOOLS
In recent years Hillary fund-raising campaigns and working expeditions have built and staffed three schools in the Sherpa country.

Yacht Club Free Of Debt Expansion Plans Possible

By RON WADE

Wire Editor
of The Daily Courier

Kelowna Yacht Club has steered a course past the threat of financial squalls during the year. Commodore Robert H. Wilson, reports the club is now debt free and "the loan from the Bank of Montreal has been retired on time, which speaks highly of the foresight of previous directors. Members' bonds have all been redeemed one full year ahead of schedule."

Commodore Wilson said the club had a very healthy balance on hand in the bank, and he expressed the club's gratitude to treasurer Sid Hubble.

He said Bruce Payer and his bar committee had done an excellent job as had Peter and Jackie Janssens, who have proved to be a first class host and hostess.

Entertainment events planned by Percy McCallum and Alex Taylor had been well attended.

The Vernon, Penticton and Kelowna yacht clubs had met to discuss a calendar of events that did not conflict with each other.

During the year the Chelsea Outboard club and the Squamish

Outboard club had visited Kelowna, and were pleased with the home club's moorage facilities and clubhouse, and had promised to come again.

Club membership had shown a healthy gain, said Mr. Wilson, and now totalled 406.

The junior skipper club program should be run again in 1964 he said, as he felt that there could be nothing more useful the club could do than to teach youngsters safe and sane boating.

The club had acceded to a request by the Boy Scouts' Association to form the 11th Kelowna Sea Scouts troop. A piloting class was being run by the club's power squadron, and advance courses were also held.

The commodore said that at the annual meeting of the club in 1963, the executive had been empowered to set up a committee to look into clubhouse expansion.

EXPANSION PLAN

"We badly need better rest room facilities, more storage space, and an office where records can be properly filed and club business carried out. Also needed are meeting rooms

that can be cut off from the bar for groups such as the executive of the sailing division, the water ski club and educational groups such as the power squadron, junior skippers and Sea Scouts, and some day a junior membership of the yacht club.

"At times the bar area and the dance floor are totally inadequate," he said. Plans to overcome these deficiencies were being studied.

Chairman R. T. Sasseville of the Moorage Committee has reported that a new commodore's wharf was built and repairs to floats carried out during the year at a cost of \$200. A fence was built on the new breakwater and tenders were out for lighting it.

LOW WATER

There were 310 stalls available, and 300 were rented out at the peak of the boating season. Some of the remainder were not fit for use due to low water and others only rented for a short time.

His committee urged a group be formed to study the placement of boats and to find better ways of accommodating the

many types of boats, and other matters pertaining to this.

Report by fleet captain Fred Dowle indicated the club had obtained a lease on the west side ferry wharf, the black top approach and about 100 feet of the beach to the north side of the wharf.

SKI BOAT DANGER

"With the increased use of the westside beach a noticeable disregard for the regulations of ski boats in relation to swimming beaches became more and more dangerous to life and limb. This is not only dangerous but may lead to charges by the RCMP," he said.

A two-way radio had been installed in the clubhouse on a standby frequency. The unit had proved valuable in four organized searches during the year. As other clubs in these waters became interested in making similar installations, the range of emergency communications could be extended to cover the entire lake, said Mr. Dowle.

RAMES PAY

BUENOS AIRES (AP)—Argentine President Arturo Illia has signed a decree boosting pay scales for the military by 30 to 40 per cent. Privates—now getting about \$25 a month—would go up to about \$30.

Australia's first commercial oil field will go into production in March 1964, at Moomba, 150 miles southwest of Brisbane.

CHAPMAN'S

Always On The Move...

Chapman's are now the foremost highway freight lines in the interior of B.C. and it all started 45 years ago when Dave Chapman, Sr., the founder, started in the transport business with a Model T Ford. He held the first highway franchise between Kelowna and Penticton, serving Westbank, Peachland and Summerland areas.

Now in 1964, under the capable management of his two sons, Dave and Eric, the company has offices and warehouses in Kelowna, Vernon, Kamloops, Penticton, Prince George, Salmon Arm and Vancouver with large fleets of diesel moving vans and delivery trucks. The area serviced by this locally-owned freight company extends from Vancouver in the south west to Prince George in the north... truly a fine example of progress from such a small beginning.

Serving You Faithfully for Over 45 Years!!

D. CHAPMAN and COMPANY Limited

THE sign of the times!

Municipal Engineers all over Western Canada are starting to save money for taxpayers by replacing poorer types of street signs with permanent aluminum alloy signs like these in use in Peachland, Penticton, Summerland and Vernon now, and by using these signs in all new subdivisions.

Because they outlast other types in all climates and under all conditions, aluminum alloy signs are being specified by municipalities every year. Installation costs are low, there are practically no maintenance costs and these signs are easier to read under all lighting conditions.

If your municipality is using these signs, you are years ahead. If not, start to sign your streets more economically, more permanently, and more handsomely with aluminum alloy signs made by a firm which produces all types of aluminum castings.

Thos. Cemm & Sons

5648 Stamford St., Vancouver 16, B.C.

THIS IS AN aerial shot of Kelowna's Big White Mountain, opened Dec. 1 for skiing by Kelowna ski enthusiasts Doug Mervyn and Cliff Serwa.

The circled area left is the site of parking facilities and the Day's chalet. Section circled at right is the bunny hill used by children and beginners.

The hill is equipped with a 500-foot rope tow. The line in the center of the picture traces the route of the 5,500

ski tow. The skiing area is a true Alpine with few trees, very beneficial to a good ski area.

Big White Ski Resort Major Tourist Attraction

By BILL STAATS
Sports Editor
Of The Daily Courier

Possibly the most significant development in the Okanagan during 1963 was the opening of Big White ski resort just outside of Kelowna.

The Okanagan and Mainline areas of B.C. are already well equipped with skiing areas, but Big White is the largest mountain in the interior and it boasts one of the best natural sites. Skiers soon learned of its existence and now make trips to it between visiting other, older areas.

The story of Big White development is a short, but already interesting one. Black Mountain was the scene of Kelowna Ski Club activities for a number of years. A small rope tow area was in operation. The lower elevation of the ski bowl resulted in a consistent lack of snow.

Cliff Serwa and Doug Mervyn, ski club directors, explored every feasible site for relocation of club operations. Big White, southeast of Kelowna, was recommended.

PARTNERSHIP

However, the club felt the project was too big and too much for them to tackle. Private individuals in the area were approached but no one was interested. Two years ago, Mr. Serwa and Mr. Mervyn decided to develop the mountain themselves.

A partnership was formed to investigate and obtain rights to the area and in April of 1963, the Big White Ski Development Ltd. was incorporated to develop and operate the resort.

A jeep access road was built

Stealing Problem Bothers India

BOMBAY (CP) — A major problem in India these days is the activity of what William Shakespeare called "sacriligious thieves."

While an ordinary thief steals only for personal gain, a sacriligious thief has a different motive. By choosing as his target religious treasures he manages to cause commotion among orthodox people, sometimes whipping up hatreds between followers of rival faiths.

In the last six weeks three major cases involving thefts of Muslim, Hindu and Christian religious relics have occurred in various parts of India.

The sacred hair of Prophet Mohammed of Islam was stolen from the Hazratbal mosque on Dal Lake in Kashmir. Silver plates and other appurtenances were pilfered from the Church of Jesus in Panjim in Goa, a former Portuguese colony on the west coast of India. Thieves broke into the Hindu shrine in Jammu in the foothills of the Himalayas and took away two 600-year-old idols.

The Muslim and Christian treasures have been recovered while a country-wide search is under way for the men who stole the Hindu idols.

Police believe that behind these thefts there are politico-religious organizations out to exploit communal sentiments for political purposes. The incidents that followed the theft of the prophet's relic from Hazratbal mosque are quoted in support of this belief.

The theft of the prophet's hair was attributed by mullahs (priests) to anti-Muslim organizations. Violent propaganda led to large-scale killings of Hindus in the town of Dacca in East Pakistan. This was followed by retaliatory attacks on the Muslims in Calcutta.

Prime Minister Shamsuddin of Kashmir, a devout Muslim, thinks the motive behind the mosque theft was to generate a chain reaction of Hindu-Muslim killings.

Kelowna Seaplane Base Right In Downtown Area

On a sunny afternoon last May, Kelowna officially opened its new seaplane base.

About 50 persons turned out May 18 to see city and visiting dignitaries launch the base in

an impressive but brief five-minute ceremony.

The newly constructed building was also open for public inspection.

The opening coincided with

the annual spring meeting of the B.C. Aviation Council being held in Kelowna for the second consecutive year.

MAYOR SPOKE

Mayor R. F. Parkinson, in opening the base said he thought Kelowna was unique in having such an installation so close to the city centre.

He told aviation council delegates, Kelowna had always been an aviation-minded city and outlined the history of aviation here.

"We have had to fight for all our aviation facilities," he said. "But we feel especially lucky and thankful to have been able to build our own seaplane base."

He said it was also fortunate that the city was able to open the base while the aviation council conference was being held here.

"By this time next year, we hope to have a heliport at our seaplane base," Mayor Parkinson told opening day spectators and guests.

Dr. Tom How of the department of transport in Vancouver, attending the ceremony, congratulated the city for its construction of the base and its interest in aviation.

FORESIGHT

"The city has shown foresight and great interest in aviation and you'll never regret it," he said.

Dr. How said the city should count its seaplane base as "a liquid asset."

"Kelowna should be very proud indeed to have both a seaplane base and a land plane base," he said.

Delegates to the aviation council meeting participated in a

Real Estate Sales Set Record During Past Year In Area

Okanagan real estate sales rocketed to an all time high in 1963.

Multiple listing service sales for the area achieved a 22 per cent increase over 1962 during the past year, Rex Lupton, president of the Okanagan-Mainline Real Estate Board said.

This amounted to a sales volume for the year of \$11,983,296, allowing the Okanagan-Mainline MLS to move into 17th spot in national sales, ahead of Westminster County, B.C. and virtually into a tie with 11th ranking Kitchener-Waterloo, Ont.

The 19 first-ranking services are all in major centres with populations of 100,000 or more, including the top two giants, Toronto and Montreal.

In 1962, the Okanagan-Mainline MLS ranked 15th in Canada, with a total of \$7,570,000.

MAJOR FACTOR

A major factor in last year's spurt said Mr. Lupton, was an

increase in the service's sales-to-listings ratio.

In 1962 the Okanagan-Mainline board sold 29 per cent of the properties listed in any one month. But in 1963, this ratio soared to 36 per cent, one of the best ratios in the country.

"On the basis of MLS performance last year and the high level of activity in evidence, sales through the service in 1964 should top the \$13,000,000 mark," Mr. Lupton said.

NATIONAL

The national picture also has shown a steady yearly increase.

In 1961 it recorded a two per cent rise to \$42,843,000. The following year it jumped also per cent to \$43,551,000 and in 1963 it reached 14 per cent for a total of \$61,504,000.

C. H. Williams, secretary-manager of the Okanagan-Mainline board said the figure reached in 1963 was beyond expectations. He said considering this area more than tripled the national average increase reflects the economy of the Okanagan is good.

He did not anticipate any slackening off in 1964 and forecast a potential \$2,000,000 increase in multiple listing sales.

Explorer Says Erickson First

OSLO (AP) — A 64-year-old Norwegian explorer who says he has unearthed evidence that Norse warriors discovered North America 500 years before Columbus is ready to support his claim before the U.S. Congress if need be.

Helge Ingstad caused a stir last November when he announced through the National Geographic society that he had found buried remains of a Norse settlement dating to the year 1000 on the northern tip of Newfoundland.

Ingstad added that there were strong indications the discoverer was Leif Erickson.

American scholars who studied the find have given the Norwegian explorer — author of their report. Now Congress is reported looking into the claim.

Ingstad and his 46-year-old archeologist wife, Anne Stine, have spent three years excavating the site near the fishing village of L'Anse aux Meadows.

It has been slow work since they had to dig with spoons and small trowels so as not to damage the scant Norse remains.

7 Years Dependable Service to All Kelowna and District Motorists!

A great amount of progress has been achieved in the last 7 years. 2 years ago we moved to our present location and since then our business has expanded to the point where we must again enlarge our building and services to fulfil the needs of our customers.

OUR PLANS FOR 1964 ARE:

- Increase present service area
- Increase recapping facilities
- Have complete modern, up-to-date equipment
- Modern wheel alignment service which is so necessary for today's high speed automobiles.

To sum it up... OK. Tire will have the most modern "under the car" service depot in the B.C. interior, designed to save you money.

OK TIRE was the first to give you a written guarantee on recapping tires on a nation-wide basis. First with a money-back guarantee. First with an unconditional guarantee against all defects.

NEW DRILL USED HERE

This is part of the apparatus used last August to locate water in the Kelowna district near Wood Lake. The rigging on the truck above is removing the 12 sections of pipe used in the drilling from the 210 foot deep hole. During the

operation, the two-curve electric logger, one of the first of its kind in B.C., was used. After a full day of operation water was found at 190 feet in a six-foot section of coarse gravel and boulder formation.

Many New Building Permits Marked Year In Winfield

By MRS. J. A. GREEN

WINFIELD — Building costs during 1963 totalled \$187,746 representing 14 new dwellings, three additions to motels and one addition to the shopping centre.

Situated on Berry Rd. just behind the shopping centre is the new post office and one of the highlights of this busy year was the opening ceremony performed on April 20 by the former minister of external affairs, the Honorable Howard Green.

The new Winfield Builders' Supply also opened its doors in April, other businesses opening in '63 were Kelo-Vern Garage, a new Standard Garage and restaurant on Highway 97 at the south end of Wood Lake and a zoo was started by Max Jacob at Duck Lake Inn where he also installed a gas station. Three more fruit stands were opened and a coin laundry will open up shortly in the new addition at the shopping centre.

NEW UNITS
New units were built at some of the auto courts on the shores of lovely Wood Lake while at others better facilities were installed.

A seaplane base situated in the bay at Wood Lake Resort was licensed and made good use of bringing in many interesting visitors.

SWANSONS
Swanson's Sprayers and A. and S. Manufacturing keeps on growing. Sales were up considerably and plans were made for extension of the business to Eastern Canada and United States with the opening by E. Swanson of a distributing agency back there slated for early '64. A sales manager was hired for the western division.

The payroll last year amounted to approximately \$38,000. The size of the staff fluctuates but at the present there are 12 employed in the shop and four in the office.

A paint shop was constructed in '63 and \$10,000 worth of new equipment was purchased for the work shop also to take care of the growing business of the

fire facilities were enlarged by two rooms.

The old Powley farm was purchased by C. B. "Jack" Carignan of Alberta, a very well known cattle man, he brought with him the nucleus of one of the best purebred polled short-horn herds anywhere; it is the only accredited herd in the district.

Small and one-man businesses opening up included welding, auto pulmanizing and a plumbing and heating business.

On Oct. 4 a kindergarten to serve Winfield, Okanagan Centre and Oyama opened in the schoolhouse near the elementary school with Mrs. Mae Doyle as the teacher and the directors are Mrs. Audrey Marshall and Mrs. Elaine Bellard.

FIRE DISTRICT
The improvement district installed a new hydrant on Okanagan Centre road, provided the volunteer firemen with coats, hats, also installed in the fire hall an oil furnace and a machine to wash the fire hoses.

Fire losses were way down as fire hints and tips, given by the firemen, helped make the residents fire safely conscious which resulted in only 16 alarms turned in and a loss of \$1,171.

The Oceola Fish and Game Club bought 25 acres of land known as the old Wall property which they have now named "Sportsman's Field."

Plans for this area include a trap-shooting range, a rifle range and a clubhouse. It is also hoped that other sports activities will be carried out there. The Winfield and Okanagan Centre Irrigation District laid a new mainline along Highway 97 from Al's Cafe to the corner of Berry Rd. at a cost of approximately \$8,000.

On Jan. 31, 1963, the Winfield, Okanagan Centre, Oyama Chamber of Commerce was formed and some of their many activities included distributing 10,000 brochures with maps and details of the area throughout Alberta, B.C., Wash., Oregon and California; also they sponsored a crosswalk and school safety patrol at Highway 97 and Berry Rd.

Large Crops Near Rutland U.K. Hears "Timber!" Resulted In Short Lay-Offs

By ART GRAY

Fruit crops in the Rutland district were larger in 1963 than in the previous year, and the Rutland Branch of the Kelowna Growers Exchange received a total crop of \$75,620 boxes (house fruit) which was almost 300,000 above the 1962 figure of 387,500.

In addition to the apples, they packed 174 tons of cherries and 162 tons of peaches. No pears were packed. All pears were handled by the Kelowna plant. The Rutland branch does not handle vegetables either, all Rutland KGE growers haul their vegetables to the city.

The Rutland house is still in the process of packing the 1963 apple crop, and has a full crew employed at this time. When the rest of the fruit in ordinary cold

storage is packed, there will still be over 20,000 boxes in the "C.A." storage here to be packed.

SHORT LAY-OFF

As a result of all this, the work season of the employees has been greatly lengthened, and this lay-off between the 1963 and 1964 crop seasons will be reduced to less than three months. The Rutland branch employs some 75 workers at the peak of the season. Manager of the plant is George R. Clarke.

SECOND HOUSE

The Rutland house of the firm of McLean & Fitzpatrick Ltd., handled a record-breaking crop of almost a million boxes of apples and pears in 1963, and, in addition, packed 229 tons of

cherries, 30 tons of apricots, 80 tons of peaches and 555 tons of pears.

The apples received amounted to 294,000 boxes (house fruit), an increase of over 300,000 above the 1962 figure, and pears almost trebled, at 85,000 against 1962's 30,000.

Largest volume of any variety was, of course, the McIntosh Reds, with 600,000 in 1963, and Red Delicious next with 269,000, both showing large increases over the previous year.

VEGETABLES

The M. & F. house also handles a large volume of vegetable products, which in 1963 amounted to 1,300 tons of onions, 150 tons of potatoes, 3000 packages of cukes and 4,000 packages of peppers.

The storage capacity of the building, both for storage and handling, was taxed to capacity to handle the crop, in spite of the construction of a new cold storage at a building cost of \$65,000 plus another \$100,000 for cold storage machinery and extension of a sprinkler fire system through the entire plant. The firm employed a maximum of 240 employees of a night shift at the peak of the 1963 season.

The operations of McLean & Fitzpatrick Ltd., extend to the southern end of the Okanagan Valley, where they have branch packing houses in both Oliver and Osoyoos. F. L. Fitzpatrick is the active head of the firm, and manager of the Rutland house, their main operator, is Ernie Cripps, of Rutland. In addition, the plant handles produce from Okanagan, Okanagan and some East Kelowna and Winfield produce. A considerable part of the Okanagan Fruit Company's fruit crop is being handled through the Rutland branch of McLean & Fitzpatrick Ltd.

OVERALL

Overall totals for the two Rutland packing houses show that the McIntosh Red variety is the largest item, with a combined total of 800,000 boxes. Red Delicious came next with a total of 353,500. The grand total of fruit received by the two Rutland houses came to 1,471,620 boxes of apples, 85,000 pears, 403 tons of cherries, 697 tons of peaches, 80 tons of apricots and 30 tons of pears.

Oyama's 1963 Fire Losses Held Down To \$7,600 Total

By MRS. D. J. EYLES

Oyama's fire losses during 1963 were confined to \$7,600 as reported by Fire Chief Doug Elliot, who reported to taxpayers at the annual meeting of the Oyama Fire Protection District.

A total of ten alarms were answered by the members of the Volunteer Fire Brigade during 1963. One serious house fire caused \$6,500 damage with the remaining loss being made up from several smaller fires including one fire in a tourist's automobile.

Firemen were called to two chimney fires, neither of which resulted in any loss. The brigade co-operated with the forestry on one occasion when eight men spent several hours one dark night in controlling a lightning strike.

Firemen also responded to two false alarms, one of which was not traced, the other was turned in in anticipation of a fire which did not materialize.

Chief Elliot, who recently stepped down as Fire Chief after five years service paid tribute to the support given him by the volunteer firemen and gave

figures showing that an average of 12 firemen had attended the 39 activations held during the year. He estimated times in excess of 100 hours had been voluntarily spent by firemen in attending practices and fires.

Referring to other activities held during 1963, Chief Elliot said firemen had taken an active part in the B.C. Fire Chiefs' convention held in Vernon and during this event had sponsored an entertainment for the wives of the visiting fire chiefs. This took the form of an afternoon tea held at the beautiful lakeside home of Mr. and Mrs. Vernon Ellison.

Training officers from the B.C. fire marshals' office had conducted a course in Oyama during 1963. This was the first such course that many firemen had attended.

In closing his report, Chief Elliot reported on the latest aspects of Mutual Aid Fire Protection as it affects Oyama. He indicated even though the Valley wide agreement had been superseded by later Civil Defence plans, we could still consider ourselves well covered.

Westbank Co-op Growers Construct Cold Storage Plant

By MRS. DORA GELLATELY

WESTBANK—One of two \$50,000 projects undertaken in this community during 1963 included the purchase of some three acres of land and construction of a concrete block building for Westbank Co-operative Growers' Association.

The building, now being converted to cold storage, is the first step in an expansion program that will cover several years, and will, with alterations and plans carried out in the main packinghouse building, provide an additional 40,000 sq. feet of cold storage, as well as provision of equipment such as purchase of many more picking bins.

Last year's record crop of 240,000 boxes of apples handled by this packinghouse alone, pointed out the already known need for more cold storage, and the planned continuing program of development should go far toward meeting storage and packing requirements for the immediate future.

Plans formulated over several years by Westbank Waterworks District culminated in 1963, in action that started with the survey and revamping of the entire water set-up.

Landowners in the downtown area also favored installation of a lagoon-type sewage disposal system, this decision also being taken in 1963.

Work in increasing the domestic water supply now is in progress under the winter work program, with sewage insulation to follow.

necessitated the exploring and securing of further sources of supply, and finally the setting up of a debenture issue, before the actual work of laying new mains and additional pipes began.

In the opinion of the trustees a minimum of 100,000 gallons of water storage over existing supply will take care of the needs of present and potential users for several years to come.

IRRIGATION SUPPLY
1963 also was a year for planned expansion by Westbank Irrigation District, and a request for assistance in this development from ARDA—the Agricultural Rehabilitation Development Act.

Assistance in carrying out these plans will increase by some 170 acres, irrigable land of which there already are 800 acres in the Westbank Irrigation District, and also will augment supplies to the latter.

Tied in with this development was a request last fall by landowners beyond the boundaries of the present district, who have asked ARDA for a survey, and assistance, in bringing a further several hundred acres under irrigation.

A \$12,500 cinder block building constructed in 1963 provided Westbank Volunteer Fire Brigade with a 30 x 40 foot engine room, a 20 x 32 instructional room, furnace and shower rooms and a fully equipped kitchen. Officially opened last October, the new fire hall houses an up-to-date fire engine, auxiliary pump and all necessary fire-fighting equipment.

LONDON (CP)—Canada has been crying "Timber!" for the last 19 years, and Britain finally has the message.

The result: Six new semi-detached houses, built with forest products from British Columbia, Ontario and the Maritime provinces, will start shooting up in England and Scotland as part of an Anglo-Canadian drive to speed house construction.

The houses will be built by

Canada's Central Mortgage and Housing Corporation, with British blessings. Designs are already completed and first on-site construction, under Canadian supervision, is expected to start in two or three months.

Both countries expect to gain. British housing experts hope to find out how to build more quickly and Canadian officials say frankly they would like to create a huge new market for homegrown timber.

"We've been campaigning on behalf of Canadian timber for the last nine or 10 years," said one Canadian official. "These six houses signify that we are reaching the high point in the campaign, and we hope it will be the breakthrough."

Two houses will be built in Edinburgh, another pair at Aberdeen, and two more at Glasgow. The last two are at Glasgow, near Liverpool. A Canadian training crew may assist in construction.

Timber foresters have fought an uphill battle. Some British felt wood construction would attract beetles, and to the hazards of cost more money. But last June a British mission went to Canada to study how things are done on the spot, and came back convinced.

In a report, the mission stressed the "high standard of workmanship and finish" in Canadian houses despite speed of construction and low labor content.

WE ARE NOT AS OLD AS THESE CARS . . .

but

WE CAN SERVICE THEM

When it comes to service, we are years old in experience. We keep your car safely on the go . . . make every trip a pleasure trip no matter year, make or model of your car. Gas-up, lube-up, tune-up . . . you name it, we'll do it with a smile . . . to keep you smiling as you drive. Expert service . . . fast, too!

RUTLAND HEALTH CENTRE STARTED THIS YEAR

An architect's drawing shows the proposed new Rutland Health Centre. The new \$33,000 structure would serve over 12,000 people in the Rutland area and the Winfield.

Okanagan Centre, Oyama, South and East Kelowna, Joe Ritchie, Black Mountain and Elginville districts. Bill Jerome, chairman of the Rutland Public Health Society said the pro-

vincial government has earmarked a \$11,000 grant for the centre, which has been matched by the federal government. Other donations have been received from organiza-

tions and the balance was being collected by public canvass of residents in the area at year's end. (Courier Photo).

Rutland's 1963 Expansion Varied Covering All Aspects of Community

By ART GRAY

Looking back over the year of 1963 the most noteworthy and memorable occurrence in Rutland was the selection of Rutland's Miss McIntosh as the "Lady of the Lake" at the Kelowna Regatta. This was definitely progress for Rutland's choice for the Miss McIntosh had competed each year for the honor of becoming Kelowna's queen of the Regatta, and on several occasions had been awarded the honor of being one of the Princesses. In 1963, crown had been bestowed upon a Rutland girl.

Daughter of Mr. and Mrs. J. Norrie Wood, Lady of the Lake Carol has not only publicized the Kelowna Regatta, but has made visitors and Okanagan residents alike, more aware of the existence and potentialities of Rutland.

CHAMBER SPONSORED
Sponsored by the Rutland Chamber of Commerce, with Hugh Fitzpatrick, a past president, sparking the interest of Board members, the Miss McIntosh contest has been associated with Rutland's annual May Day sports since 1958. B.C.'s Centennial Year.

Mrs. R. C. Lucas, in the beginning, and Mrs. Kelly Slater for the past two years, have been responsible for the coaching and training of Rutland's candidates, both for the Miss McIntosh and the Lady of the Lake contests, and deserve the thanks of the community for their efforts, this year crowned with success, literally!

MEMORIAL AWARD
Evidence that this was Rutland's year, and again in the field of youth, is the choice of Joe Ueyama, son of Mr. and Mrs. Hideo Ueyama, Rutland, as recipient of the Augie Cannon Memorial Award, presented annually to an individual pupil of School District 23, who combines a high quality of athletic, academic and public service together with leadership qualities.

Still in the athletic field, the Rutland Rovers, long the mainstay of football in the community, but this year including a large number of young players, with a few older hands to steady them down, won the play-offs in the Kelowna district, and went to the coast to participate in the provincial play-downs, losing out in a close contest there.

BOWLING
Bowling is a game that has developed a great increase of interest in the community since the construction of the Valley Lanes here 15 months ago, and June, 1963, Mts Koka became the proud owner of a new automobile, won in a B.C. Interior-wide rolloff.

CONSTRUCTION
1964 was a good year for Rutland in the construction of new buildings, with a total value of \$750,000.

Largest building was the new cold storage constructed for McLean & Fitzpatrick Ltd., the fruit shipping firm. The fully modern building cost \$485,000 to install, together with a complete sprinkler system for fire protection for the older buildings as well as the new storage added another \$100,000 to the costs.

The building became necessary with the transfer of a large part of the Occidental Fruit Company's crop to the Rutland firm.

A check of the past accounts indicated the arrears were not as great as estimated, and due to a bank error, street lighting funds had been credited to C of C account. While the street lights were off, however, great interest was created, and the end result has been a better basis for the service.

CHAMBER OF COMMERCE
The Rutland chamber of commerce took the initial steps during 1963 in what may prove a most important move toward full conservation and use of the water resources of the northern half of the Okanagan Valley.

Initiated by president Bert Hill, the program calls for the construction of storage in the upper reaches of Shuswap river, and a connecting pipeline down through Oyama, Winfield, Rutland and on to Kelowna, to coordinate all the several irrigation systems and domestic water projects, with balancing reservoirs in each area.

This would assure all districts against a water shortage, and also provide a supply of mountain water for domestic use, free of the contamination and pollution that are already a menace, and which will become a greater threat to the health of both city and rural residents as time goes on. Support has been received from the Winfield chamber of commerce and already a joint committee has been set up to study and promote the plan.

The plan contemplates the fullest development of all the storage facilities of the mountain lakes and streams that can serve the area, even to the possible diversion of some of the waters of the West Kettle, which is believed to be quite feasible.

POLICE
Another project that received the attention of the chamber was the need for increased police protection. A brief was presented to the RCMP in this connection, requesting a resident constable. While this was not obtained, the prospects are that additional staff for rural areas may be obtained as a result, but still based in Kelowna.

To augment the scrap metal drive was undertaken, and the indications are that the results are going to be highly satisfactory.

The local Chamber also sponsors the Miss McIntosh contest in connection with annual May Day.

MINOR BASEBALL
A Rutland minor baseball association was formed in the district in 1963, an expansion of the former Rutland little league association. Many of the same officials carried on, with Adam Flegel continuing as president. Stimulating the activity has been the acquisition of a new park, developed on a ten acre property on Moyer Road, in the northern part of Rutland. This property, belonging to Miss Edith Gray, was set aside by her for use of the children of the community.

Three Little League diamonds, complete with backstops, were set out on the new location, relieving the Rutland centennial park from overcrowding and avoiding conflict with softball schedules. The Pony League, which numbers 22 firemen, with Norton Wood as fire chief, and Kyo Yamashita as assistant chief. All members are volunteers.

NEW BUSINESS
During 1963 there were several new businesses started up in the Rutland district. These include the opening of an office in the Valley Bowling Lanes building by C. E. Staden, public accountant, of Kelowna, which also serves as office for the Rutland Water Works District, of which Mr. Staden is the secretary. Mrs. Ralph Ruff being in charge of the office. McCallie Realty of Kelowna also uses this office on a part time basis.

A new barber shop, called the "Snip and Clip" has also been opened in the same building. Bud Reed is proprietor.

The Rutland Ladies' Auxiliary to the Kelowna Hospital opened a Thrift Shop in the remaining location, raising a considerable amount of money for their charitable purposes through the operations of the shop.

"Duggan's Lunch," operating in the old premises of the "Nook Cafe," now completely renovated and altered, provides business men and visitors with home cooked meals. The opening in November last, of the Rutland Pharmacy Ltd., by Lorne A. Snook, at the Rutland corner, in the fine new block, built for George W. Martin, of Kelowna, was a welcome event, filling a great need in the district.

ROAD
One of the biggest stimulants to business in the Rutland community area around that particular section, has been the black-topping of the road up to, and beyond Joe Rich valley, and business men are hoping that this will be continued until the road is completely black-topped to Rock Creek, providing a fine scenic alternative road to the Boundary country.

The development of the Big White ski resort has greatly increased the use of this road, and stimulated garage and restaurant business here. Incidentally, the buildings at the Big White resort were constructed by a local company, Quadra Construction, headed by Hugh D. Fitzpatrick of Rutland. As this popular new ski resort develops, there will be greater benefits felt by the Rutland business district.

WATERWORKS
The Rutland Waterworks District reported an increase in the number of water connections to over 340, representing an increase of about 25 per cent over the figures at the beginning of 1963.

The installation of meters that was begun last winter, as a winter work project, has not yet been completed. This introduction of measurement was being instituted in a water conservation move due to excessive use of domestic water during summer months. Efforts to locate additional sources of water supply have been made, and last May it was thought that a heavy flowing well found on Joe Jas-

chinsky's property in Hollywood was the answer, but the water proved to be strongly detergent, and unsuitable for the purpose. During the past year the District added a chlorinator room to the pump-house in Mission, B.C., at a cost of \$1,200 and added a cement block construction with the profits of their Thrift Shop was built due to the fact that it was found that the Rutland district was destroying the "Rutland Room" at the Kelowna hotel equipment, through the action of the Rutland Waterworks District's board of trustees is R. C. Lucas, and manager is John Ivens.

FIRE BRIGADE
The Rutland Fire Brigade's efficiency was increased during 1963 by the addition of a 2,800 gallon tank truck. The cost was \$4,000 plus the cost of certain alterations, repairs and added equipment. The present fire hall only having room for two trucks, the new tank truck is being sponsored solely by the Elementary schools, and a very successful year.

A generator, two lamps and a smoke ejector were also added to the equipment of the brigade, which numbers 22 firemen, with Norton Wood as fire chief, and Kyo Yamashita as assistant chief. All members are volunteers.

Fire loss during 1963 hit an all-time low at less than \$1,500. The Fire Protection District which includes all of the Rutland area, part of the north beach, and a section of Elginville, has not been extended further this past year, though there have been some properties desiring to come in. The District is endeavoring to acquire property on which to construct a larger fire hall. Trustees of the District are M. W. Marshall, R. C. Parkes, Nick Hush, E. Schneider, and L. M. Petch.

CENTENNIAL PARK
Rutland's Centennial Park has made some progress in the past year, with improvements to the hall, in the painting of the exterior of the building, and re-shingling of the roof with asbestos shingles, adding greatly to the outward appearance of the building.

The bleachers at the softball diamond were rebuilt, and additional seating placed around the softball and baseball diamonds. The general appearance of the park was improved last year by the purchase and use of a power mower to keep the grass cut over the entire property. This self propelled mower is being replaced this year with a larger unit.

During 1963 the swimming pool was operated without financial loss for the first time, due to a decision to increase fees. An innovation that proved highly popular, was the opening of the pool a month earlier, for the use of the high school pupils, under the supervision of teacher, President of the Park in 1963 was Ewald Hanet, with Mrs. Burt Showler as secretary.

CONTRIBUTIONS
Contributions amounting to \$500 from the Rutland Agricultural Society have also greatly aided the Park Society in the work of maintenance and improvement of the park and the swimming pool. Organizations other than athletic groups have use of facilities at the Park hall. The Girl Guides, Women's Institute, the Senior Citizens' Club and other groups use the hall regularly, and there is the possibility that it may be used as a temporary kindergarten quarters.

HOSPITAL AUXILIARY
The Ladies' Auxiliary to the Kelowna hospital is a new organization that was formed in 1963. In January of last year the group held its first meeting, and elected Mrs. R. C. Parkes president; Mrs. R. O. Holole, sec-

etary, and Mrs. Roy Tammen, treasurer. Membership and social convener was Mrs. Burt Showler. During the course of their first year the group were able to raise \$1,200 for the hospital, by means of bake sales, trees, at a cost of \$1,200 and added a cement block construction with the profits of their Thrift Shop was built due to the fact that it was found that the Rutland district was destroying the "Rutland Room" at the Kelowna hotel equipment, through the action of the Rutland Waterworks District's board of trustees is R. C. Lucas, and manager is John Ivens.

THE RUTLAND WOMEN'S INSTITUTE
The Rutland Women's Institute, the oldest established organization in the community, having been first formed in 1925, and in continuous operation since, has, in addition to their usual activities, joined last year with the Chamber of Commerce in sponsoring a "Welcoming Committee."

This is to consist of two members, Mrs. John Calhoun and Mrs. George Horton, and their task will be to call on new residents, and acquaint them with the facilities of the community, and welcome them to the district, and present them with gift certificates from local merchants.

BCPGA
The Rutland Local of the British Columbia Fruit Growers Association took a forward step in the early part of 1963 when they absorbed the Elginville local into their organization. As a result of this amalgamation the Rutland-Elginville local became the third largest in the fruit growers association, exceeded only in numerical strength only by the depart-

ment of the Penticton and Summerland locals. Elected president of the Rutland-Elginville local at the recent annual meeting in November last was George Whistler, who is also president of the Kelowna Growers Exchange. Vice chairman is Otto Graf, and John E. Duddy is secretary-treasurer.

More Whoopers Fail To Show
WASHINGTON (AP) — The U.S. fish and wildlife service has given up hope that more wild whooping cranes will show up, so it has put the official total for the wintering flock at 33.

This became plain today when the interior department announced that the 33 whoopers wintering at Arkansas National Wildlife Refuge on the Texas Gulf Coast are believed to comprise the entire wild population of North America's largest wedding bird.

The total includes seven young of 1963, but the apparent loss of six adult birds from the flock reached Arkansas from Saskatchewan in the fall of 1962 indicates a net gain of only one bird for the year, the department in numerical strength only by most said.

chinsky's property in Hollywood was the answer, but the water proved to be strongly detergent, and unsuitable for the purpose. During the past year the District added a chlorinator room to the pump-house in Mission, B.C., at a cost of \$1,200 and added a cement block construction with the profits of their Thrift Shop was built due to the fact that it was found that the Rutland district was destroying the "Rutland Room" at the Kelowna hotel equipment, through the action of the Rutland Waterworks District's board of trustees is R. C. Lucas, and manager is John Ivens.

This is to consist of two members, Mrs. John Calhoun and Mrs. George Horton, and their task will be to call on new residents, and acquaint them with the facilities of the community, and welcome them to the district, and present them with gift certificates from local merchants.

BCPGA
The Rutland Local of the British Columbia Fruit Growers Association took a forward step in the early part of 1963 when they absorbed the Elginville local into their organization. As a result of this amalgamation the Rutland-Elginville local became the third largest in the fruit growers association, exceeded only in numerical strength only by the depart-

ment of the Penticton and Summerland locals. Elected president of the Rutland-Elginville local at the recent annual meeting in November last was George Whistler, who is also president of the Kelowna Growers Exchange. Vice chairman is Otto Graf, and John E. Duddy is secretary-treasurer.

More Whoopers Fail To Show
WASHINGTON (AP) — The U.S. fish and wildlife service has given up hope that more wild whooping cranes will show up, so it has put the official total for the wintering flock at 33.

This became plain today when the interior department announced that the 33 whoopers wintering at Arkansas National Wildlife Refuge on the Texas Gulf Coast are believed to comprise the entire wild population of North America's largest wedding bird.

The total includes seven young of 1963, but the apparent loss of six adult birds from the flock reached Arkansas from Saskatchewan in the fall of 1962 indicates a net gain of only one bird for the year, the department in numerical strength only by most said.

chinsky's property in Hollywood was the answer, but the water proved to be strongly detergent, and unsuitable for the purpose. During the past year the District added a chlorinator room to the pump-house in Mission, B.C., at a cost of \$1,200 and added a cement block construction with the profits of their Thrift Shop was built due to the fact that it was found that the Rutland district was destroying the "Rutland Room" at the Kelowna hotel equipment, through the action of the Rutland Waterworks District's board of trustees is R. C. Lucas, and manager is John Ivens.

FIRE BRIGADE
The Rutland Fire Brigade's efficiency was increased during 1963 by the addition of a 2,800 gallon tank truck. The cost was \$4,000 plus the cost of certain alterations, repairs and added equipment. The present fire hall only having room for two trucks, the new tank truck is being sponsored solely by the Elementary schools, and a very successful year.

A generator, two lamps and a smoke ejector were also added to the equipment of the brigade, which numbers 22 firemen, with Norton Wood as fire chief, and Kyo Yamashita as assistant chief. All members are volunteers.

Fire loss during 1963 hit an all-time low at less than \$1,500. The Fire Protection District which includes all of the Rutland area, part of the north beach, and a section of Elginville, has not been extended further this past year, though there have been some properties desiring to come in. The District is endeavoring to acquire property on which to construct a larger fire hall. Trustees of the District are M. W. Marshall, R. C. Parkes, Nick Hush, E. Schneider, and L. M. Petch.

CENTENNIAL PARK
Rutland's Centennial Park has made some progress in the past year, with improvements to the hall, in the painting of the exterior of the building, and re-shingling of the roof with asbestos shingles, adding greatly to the outward appearance of the building.

The bleachers at the softball diamond were rebuilt, and additional seating placed around the softball and baseball diamonds. The general appearance of the park was improved last year by the purchase and use of a power mower to keep the grass cut over the entire property. This self propelled mower is being replaced this year with a larger unit.

During 1963 the swimming pool was operated without financial loss for the first time, due to a decision to increase fees. An innovation that proved highly popular, was the opening of the pool a month earlier, for the use of the high school pupils, under the supervision of teacher, President of the Park in 1963 was Ewald Hanet, with Mrs. Burt Showler as secretary.

CONTRIBUTIONS
Contributions amounting to \$500 from the Rutland Agricultural Society have also greatly aided the Park Society in the work of maintenance and improvement of the park and the swimming pool. Organizations other than athletic groups have use of facilities at the Park hall. The Girl Guides, Women's Institute, the Senior Citizens' Club and other groups use the hall regularly, and there is the possibility that it may be used as a temporary kindergarten quarters.

HOSPITAL AUXILIARY
The Ladies' Auxiliary to the Kelowna hospital is a new organization that was formed in 1963. In January of last year the group held its first meeting, and elected Mrs. R. C. Parkes president; Mrs. R. O. Holole, sec-

etary, and Mrs. Roy Tammen, treasurer. Membership and social convener was Mrs. Burt Showler. During the course of their first year the group were able to raise \$1,200 for the hospital, by means of bake sales, trees, at a cost of \$1,200 and added a cement block construction with the profits of their Thrift Shop was built due to the fact that it was found that the Rutland district was destroying the "Rutland Room" at the Kelowna hotel equipment, through the action of the Rutland Waterworks District's board of trustees is R. C. Lucas, and manager is John Ivens.

THE RUTLAND WOMEN'S INSTITUTE
The Rutland Women's Institute, the oldest established organization in the community, having been first formed in 1925, and in continuous operation since, has, in addition to their usual activities, joined last year with the Chamber of Commerce in sponsoring a "Welcoming Committee."

This is to consist of two members, Mrs. John Calhoun and Mrs. George Horton, and their task will be to call on new residents, and acquaint them with the facilities of the community, and welcome them to the district, and present them with gift certificates from local merchants.

FORECAST: 1963

BRITISH COLUMBIA'S BEST YEAR YET!

1962 was predicted as a record-breaking year and it was even better than forecast. 1963 proved better still. Now all economic indicators point up for 1964, as the excitement mounts in British Columbia.

Every indication is that 1964—like 1962 and 1963—will become another record-breaking year for British Columbia. Evidence of economic expansion is apparent in every area, with the highest total capital investment in one year in our province's history now predicted. Leading the way are the tremendous hydroelectric projects on the mighty Peace and Columbia rivers. Each ranks among the greatest ever attempted on this continent. Together they form a guarantee that British Columbia will have a vast pool of low-cost power for all future development.

This year will see record-breaking production in every major industry. Already, in the twelve months of 1963, the total value of our manufactured products rose seven per cent to a record \$2.3 billion. Employment reached the highest level in our history during the year, and our personal income index rose 7.5% to a new record high.

In British Columbia today, every year dawns brighter than the last. Our greatest years still lie ahead.

1963: THE RECORD

CAPITAL INVESTMENT—New capital invested in the Province is estimated at a level 10% above 1962, at \$1,400,000,000. **2nd best year on record.**

FORESTRY PRODUCTION—Net value of production up over 6%, at \$850,000,000. Expansion continues throughout the industry, with over \$200 million in pulp and paper mill construction alone now under way. **Best year on record.**

MINERAL PRODUCTION—Mineral production up 9.2%. Development programmes continue at a record high level. 1963 net value of production of all minerals, including petroleum and natural gas: \$250,000,000. **Best year on record.**

OIL AND NATURAL GAS—Crude oil production up 44.3%. Natural gas production up 8.7%. Continent's greatest exploration programme continues in northeastern interior, new pipeline projects now under construction. 1963 net value of production: crude oil—\$25,400,000; natural gas—\$11,200,000. **Best year on record.**

MANUFACTURING—Value of manufacturing shipments up 7%, to \$2,335,000,000. **Best year on record.**

CONSTRUCTION—Value of building permits issued up over 14%, to \$270,000,000. Important gains in housing starts and completions, with each registering increases of 22%. **Best year on record.**

INTERNAL TRADE—Retail sales up over 5%. 1963 retail sales: \$1,875,000,000. **Best year on record.**

FOREIGN TRADE—Exports throughout British Columbia customs ports up over 4%, to \$1,300,000,000. **Best year on record.**

LABOUR—Employment up 3.4%. Personal income up 7.5%. Both reached highest levels on record during 1963.

TOURISM—Continuing increases in every area of tourism. **Best year on record.**

Expansion projects to provide greater utilization of our forestry resources are perpetually under way in almost every region of the Province.

Important developments in the mining and petroleum industries come every month, as development reaches record levels. The continuing search for petroleum and natural gas is the greatest on this continent in this decade.

Work is proceeding on schedule on the Peace River Project, one of the greatest hydroelectric developments in North America's history. First power will be generated in 1968.

A vital factor in British Columbia's economic growth is our ten year, billion dollar highway and water crossing construction programme.

BENNETT WINS FALL ELECTION

Premier Bennett and his wife at the Victory Cafe at Social Credit headquarters soon after his reelection had been announced Sept. 30, 1963, the second election last year.

for B.C. voters. In the South Okanagan constituency, Premier Bennett and his party were re-elected by a 19 per cent majority vote. This was his fifth straight victory in 11 years. The 6,170 voters in Kelowna gave Premier Bennett a personal victory of 9,200 over his closest opponent, the New Democratic Party, which lost by two votes.

Healthy Surplus Forecast For City's '63 Operations

By R. P. PARKINSON
Mayor
Of the City of Kelowna

The year 1963 has been an important year for Kelowna, not so much in things accomplished, but for that and for the work started this year that will come to fruition in 1964.

We have had a successful year financially, and much work has been done in all City departments, and when the final figures are finalized I am sure we will show a healthy surplus.

Our reputation on the bond area by depositing sand from

market is one of the best, as evidenced by our success with our last issue.

During this past year we had many long-term projects that took much of city council time and as the year draws to a close we are only now beginning to see the results.

Beach improvement is something council has taken a very good look at. We experimented with the beach in the City figures are finalized I am sure we will show a healthy surplus.

Our reputation on the bond area by depositing sand from

ated for the first full year with \$200,000. Fire Hall extension, with Ald. C. M. Lipsett and Ald. Jack Bodford and it proved very beneficial in carrying out projects provided for in the budget.

The Central Okanagan Regional Planning board was instituted during the year, and although Kelowna and Peachland have made their appointments to the board, the provincial government still has not done so. The board is therefore not operative.

Whereas no decision has been made on these projects, we have spent much time discussing them and much planning has already been done. They will all of course have to go before the public in the form of money bylaws.

PARKING

Under the downtown parking lot, purchased by city businessmen, is doing the job it was intended for and it is providing off-street parking for the all-day parker on a rental basis and two-hour free parking for store customers.

The south one-third of the lot, Arena parking lot was designated as a two-hour controlled parking area leaving the balance free for all day parking this year, and it seems to be serving a very useful purpose in that way.

In the future as our population increases, more and more off-street parking will be required. It is hoped future parking areas can be financed by revenues received in this manner.

SEWER

During the year the sewerage treatment plant was enlarged and made more efficient and the Woodlawn area sewerage installation was completed.

During the past year more than 30,000 people visited our museum.

The electrical department provided many more areas with street lighting and with the co-operation of Okanagan Telephone Company a progressive clearing of the downtown area of unsightly poles, either by playing wires underground or placing them in lattice, continued during the year.

SMALLER PARKS

The parks advisory committee recommended to council that smaller parks back from our lakefront be sold and the money received be used to increase facilities at our larger parks.

We are convinced small parks are used very little, cost much to maintain and the conception of larger play areas will spread throughout the city in good business.

TRAFFIC

Traffic surveys have been going on all year and many improvements on ten projects.

We propose now to get estimates on ten projects.

DEVELOPMENT FUND

I would like to see the city and the chamber of commerce take a good close look at the possibility of a local development fund. If this were set up we could buy up beach property or industrial land for better use of this city.

High rise apartments are something we have all heard much about this past year, and we can say now with some assurance that the early part of 1964 will bring a decision from council on this important matter.

TRAVEL

We have many people interested and as soon as that Peter Oberlander brings in his report they will be allowed to go.

We have been negotiating all this year with the federal government on the site for the proposed new federal building here again we hope the early part of this coming year will bring a decision.

WHITES EARN MORE

PRIVILEGE (Apostrophe) — In spite of recent pay raises, the average African teacher in South Africa still earns much less than a white teacher. An African teacher with matriculation, plus a professional certificate, earns a maximum \$2,000, compared to a maximum \$4,200 paid to a white teacher with the same qualifications.

Street paving and rebuilding—\$200,000. Fire Hall extension, with Ald. C. M. Lipsett and Ald. Jack Bodford and it proved very beneficial in carrying out projects provided for in the budget.

The Central Okanagan Regional Planning board was instituted during the year, and although Kelowna and Peachland have made their appointments to the board, the provincial government still has not done so. The board is therefore not operative.

Whereas no decision has been made on these projects, we have spent much time discussing them and much planning has already been done. They will all of course have to go before the public in the form of money bylaws.

Under the downtown parking lot, purchased by city businessmen, is doing the job it was intended for and it is providing off-street parking for the all-day parker on a rental basis and two-hour free parking for store customers.

The south one-third of the lot, Arena parking lot was designated as a two-hour controlled parking area leaving the balance free for all day parking this year, and it seems to be serving a very useful purpose in that way.

In the future as our population increases, more and more off-street parking will be required. It is hoped future parking areas can be financed by revenues received in this manner.

SEWER

During the year the sewerage treatment plant was enlarged and made more efficient and the Woodlawn area sewerage installation was completed.

During the past year more than 30,000 people visited our museum.

The electrical department provided many more areas with street lighting and with the co-operation of Okanagan Telephone Company a progressive clearing of the downtown area of unsightly poles, either by playing wires underground or placing them in lattice, continued during the year.

SMALLER PARKS

The parks advisory committee recommended to council that smaller parks back from our lakefront be sold and the money received be used to increase facilities at our larger parks.

We are convinced small parks are used very little, cost much to maintain and the conception of larger play areas will spread throughout the city in good business.

TRAFFIC

Traffic surveys have been going on all year and many improvements on ten projects.

We propose now to get estimates on ten projects.

of approximately \$800,000 closely following our overall plan.

PROGRESSIVE

While 1963 building was just over \$3,000,000, down from the two previous years, it was a most progressive building year.

School District No. 23 proposes to start on a school for retarded children and two large elementary schools this year. Five new apartment blocks, providing 81 additional units are under construction. The David Lloyd Jones Home will be expanded, two more motels will be built and the Capri Motor Inn addition will be a great boon to the city.

The arena continues to be used to good advantage and in the spring the old wooden floor will be replaced with a cement floor and new piping. This change will allow ice to be removed and new ice put back in a matter of hours.

The curling club, now expanding, the golf club, the yacht club and the community theatre all continue to prove their worth to our city.

There are many more projects in the planning stage. I am sure will enhance the city of Kelowna in the eyes of its residents and its visitors alike.

VERNON HOSPITAL BOILER ROOM STARTED IN MAY

Vernon Jubilee hospital laundry and boiler room extension is expected to be completed for occupancy by mid-March at the latest. Here workers are shown during the early stages of construction when the \$300,000 project was first started last May. The new premises will include a laundry room, boiler room, board room, library and certain heating adjustments were necessary to the main portion of the hospital to conform with the new power plant. Hospital officials are contemplating a special opening ceremony to be held when the entire project is complete, but this decision has been left up to the board of trustees. (Courier Photo)

Progressive Year Seen In Vernon During 1963

By BOB BAUER
Vernon Bureau
Of The Daily Courier

VERNON — Despite considerable public apathy Vernon has recorded one of its most progressive years in its history. During 1963 this city recorded its highest building boom since 1959 by surpassing the \$2,000,000 mark. Contributing to such a high value was construction of the \$250,000 Vernon Restholm for senior citizens; a \$23,000 powerhouse live theatre; the \$70,000 Hillside project; a \$300,000 hospital laundry and boiler room extension; and a \$30,000 city sewage treatment plant extension project.

Building permit values during 1963 increased approximately 66 per cent over the previous year in surpassing the \$2,000,000 mark. Total permit values for the year was \$2,092,472, compared to \$1,257,312 in 1962.

Vernon's biggest civic local improvement scheme was the \$70,000 Hillside project, covering reconstruction and paving of five streets between 23rd and 26th streets. The project, completed in mid-September, was ratified by a bylaw in March, 1962, and is the biggest reconstruction and paving program in this city's history.

Under the terms of the local improvement agreement, the city paid for cost of reconstructing streets, and blacktopping was paid for by the home owners.

Included in the project was construction of a link on Barnard Ave., between 23rd and 24th streets, which made the city's main street a thoroughfare to the Lakeview subdivision and the east end of the city.

Vernon's senior citizens Restholm project was another highly welcomed sight.

The Restholm association board of executives decided to issue debentures for \$100,000, and along with the first donation of \$50,000 and the provincial government grant, they created a building fund of \$200,000. Another \$35,000 was acquired by a public referendum at the December municipal election.

The residence will accommodate up to 50 persons, with room and board charges amounting to \$95 per month.

Association president Guy P. Bagnall referred to the project as a "monument to the generosity of the populace."

THEATRE

The Theatrical Arts Society and the Vernon Little Theatre also contributed to progress in 1963.

City council highly commended the executives and members of the society and the theatre association, on the "energy and determined civic enterprise" which saw the establishment of a live theatre in Vernon.

Members of the Little Theatre group contributed 2,500 man-hours of volunteer labor since the project started in March. The building was donated to the Arts Society by the B.C. Hydro.

A 30-foot extension to the building provided additional workshop facilities and extra stage space, with the basement being converted to clubrooms, which will be rented for private meetings and dance classes.

Included in the \$23,000 investment is an ultra-modern lighting gallery, a stage which can be converted for Shakespearean type plays, colorful interior decor, and seating accommodation for approximately 150 people.

Aside for the Hillside project, Vernon's civic government carried out a \$90,000 renovation and extension of the present sewage treatment plant at 25th Ave. and 43rd St. This work has been carried out over a three-year period and was concluded in the early fall of 1963.

Included in the project was the erection of two new pump-houses, renovations to laboratory and office building; modification of the plant further resulted in increasing the capacity in the efficiency of the primary pumping, installing new secondary pumping units, installation of a new chlorine contact chamber, new sludge circulating pump, insulation and stuccoing of the number two digester, complete rebuilding of one filter, and renewal of all internal piping as required.

All of this, combined with the reduction of flow at the Bulman's packing plant in the city, has reduced the sewage flow by approximately one third, according to city engineer Dave MacKay.

General landscaping around the plant allows it to fit in with the improvement district it is in, therefore, also appealing to businesses in the area.

WHAT GOES UP . . .
HORTON, England (CP) — Twelve-year-old Margaret Paget launched a balloon in a carnival competition in this Gloucestershire village. Six months later she discovered it had landed in East Germany, 500 miles away. A label tied to the balloon gave her name and address to the finder.

APPROVES SCHEME
PORTSMOUTH, England (CP) — A £1,250,000 scheme to provide a new shopping centre for Portsmouth has been approved by the community corporation. Work on the new shopping centre is to start soon and is expected to take 20 months.

LARGEST GLOBE
The world's largest unmounted globe, in Explorers' Hall, Washington, D.C. weighs 1,000 pounds and measures 34 feet around the equator.

New Furniture Store Opens in Large Premises

The doors swung open at 2 p.m. November 21, 1963, and two floors of fine furniture were on display to the public of Kelowna and district.

This signalled the latest addition to the city's growing roster of stores and businesses.

Mr. and Mrs. Hector Turvey added another furniture store in the Pandey street premises previously occupied by Hittner Brothers who moved their entire operation into their new location on Leavenworth.

The Turveys were no strangers to this line of business. Mr. Turvey, the owner-manager, is a 40-year veteran in the business. They left their son, Dan, in charge of their Medicine Hat, Alta. store and moved here to prepare the new operation in November 1, 1963.

Mr. Turvey said eight years before they opened in Medicine Hat, they saw this Kelowna store but it was unavailable at that time.

"We were on our way through the city for a holiday at the coast last August and saw the premises vacant. We have always loved beautiful Kelowna and its most hospitable people so we took steps immediately to arrange our move here," he said.

Mr. Turvey said he felt the people of this district deserve a well appointed furniture store in which to shop. "And we are working towards that end."

"I definitely feel Canadian furniture manufacturers can outrun a United States manufacturer in quality," Mr. Turvey said.

"We represent most of the more famous furniture lines in the country."

He said over the years he has built up good contacts with manufacturing firms all across Canada. "If customers want something we do not carry, we will be able to get it for them with the least possible delay."

Turvey's are continuing a feature of oil paintings direct from Paris. He said these are genuine paintings of some value.

Mr. Turvey said the Italian provincial line of furniture was the style now most in demand primarily because it fits the almost any style of home. They also carry Danish and French provincial but he said these need a particular type of home. He also said it was difficult to keep up to the changing latest designs.

Mr. Turvey was born in England and came to Madawaska, Man. when he was 10. There the family farmed and he received his early schooling. He later graduated from Brandon College in 1919 and later moved to Peterborough, Ont. where he worked in a department store.

In 1933, he moved to Edmonton and worked in a large store's furniture department. He became manager of a furniture store in Medicine Hat in 1951 and four years later opened his own store.

New City Contracting Firm Completes Four Buildings

A relative newcomer to Kelowna, Albert Stober, has in the space of one year constructed four projects totaling about \$600,000.

During 1963, Mr. Stober built the Buckland apartments, the Inlander Terrace apartments and the Inland Gas building.

Mr. Stober said the Buckland, a 32 suite building at 445 Buckland Ave. is the only apartment structure in the city of Kelowna with elevator service. Construction on this project started in January and it was completed in July.

In the Inlander apartment block just recently completed except for some finishing touches, there are 17 suites. Work started on this building in September. Its location is 1800 Pandey street.

At 552 Rosemead avenue, the six-suite Terrace apartments are situated. This project was started in April and completed in September.

Mr. Stober said the new Inland Natural Gas Company building was finished in July. Its construction began in April.

The site is a one-floor office building with two separate offices. One is unoccupied.

Mr. Stober came to Kelowna in January 1963 from Medicine Hat, Alta. He has been a builder for 14 years and is working on a project in Vernon at present.

He and his family are now living in the Buckland apartments but he said he is planning to build a home in Kelowna. "I plan to make my permanent home here," he said.

New Drapery Display Featured in Paint Store

With the arrival of September 20, 1963, drapery owners in Kelowna were treated to a ...

Proprietor, Frank Beagle, is a native of New Westminster, B.C. He worked with a ...

After working at the coast and lower mainland, he became the company's travelling representative in the Kootenay and Okanagan districts. In December, 1960, he purchased the Kelowna store from Don Maxwell. Another employee of the store, Rondeau Brown, is a native Kelownian and has spent two years with the store.

A highlight of the paint section is the automatic paint mixer. The mixer offers an almost unlimited supply of custom colors, and can be measured down to 1/48 of an ounce.

NEW DEPARTMENT
A drapery hardware department has also been added. Mrs. Florence Morrison handles the drapery department.

The store is a dealer of General Paint products which is entirely B.C. owned and operated with all plants and offices in this province.

The new building is 20 feet by 100 feet. This includes a warehouse at the back.

The construction is done with laminated beams and the remainder, mainly dry wall. The east wall which contains a striking paint display is concrete block.

The store front is done in mosaic tile and the floor in Vinyl asbestos tile.

BREEZEWAY
A six-foot breezeway leads from the main street to the back of the store. At night, this is lit by display windows. The section is covered.

The beams which cover the walk, will make Kelowna Paint and Wallpaper's next expansion move much easier.

There is parking at the back of the store for customers. At the new premises, they carry a complete line of famous Monamel paints which includes everything from the popular latex to finishes for all types of wood.

The wall-covering department includes wallpaper in standard and the new flock. They also have glasscloths and vinyls, the latest in wall coverings.

City Street Lights Installed in 1963

New areas of the city accounting for 80 per cent of the street lights installed during 1963.

The gross level of revenue was up 13 per cent during the year. Total kilowatt hours sold were \$8,479,814.

A. E. Guy, electrical superintendent, said this was an indication of the growth and prosperity of the city.

There were 130 street lights installed during the year. Of these 118 were incandescent lighting.

NEW SERVICES
Three revenue from energy sold was \$886,041. A total of 26 new services were connected to the system.

Four additional switchgear units were installed in substations to replace existing switchgear that had become inadequate. These are a means of controlling the various sections of the distribution system.

UNDERGROUND
Poles on Bernard avenue have been replaced with underground wiring. Seven mercury street lights were installed at a total cost of \$2,800.

Two new feeder circuits, at a cost of \$4,000 were built in the north end of the city to supply increasing load in the industrial area.

To supply the new vocational school, 1,000 circuit feet of line was put in. The 1,200-volt line cost \$2,000.

The distribution system was extended to supply three new subdivisions. They are situated on North Glenmore, Glenburn and Oakland and Lynwood and Ayre.

STREET LIGHTS
There are still some streets without lighting and Mr. Guy said he hopes to put in 100 more lights in the coming year.

There are plans also to convert the sodium lighting on

New Light In Pool Hall

The games of eight ball, billiards, snooker and others associated with a pool hall had a new light splashed on them in Kelowna last April.

A father and son team of Sam and Carlo Porco renovated their Elms Street premises from stem to stern and roof to floor. The area, which measures 60 feet by 60 feet has had almost every feature re-done.

NEW BYLAW
On March 11, 1963, first reading was given a by-law on facilities for pool rooms that cater to male and female players.

Carlo Porco said he had drawn up the new plans for his poolroom for anyone.

hall in November with standards of mixed pool in mind.

The by-law regarding the facilities set down details for lighting, washroom and age requirements. It also sets down that the interior of the pool hall must be visible from the street.

According to city government officials, the facilities were all right.

START IN MARCH
Work started early in March by the pair, who did almost all the work themselves in about six weeks.

A dry wall construction was put on the lower portion of the walls. The remainder was painted white as was the ceiling.

Complete sets of fluorescent lights were installed to replace the old overhead lights, producing a bright, cheerful atmosphere.

The recreation centre is open to the male and female set, providing clean enjoyable surroundings for anyone.

For over 16 years we have been pleased to serve our fellow Kelownians.

WHEN THERE'S BUILDING ACTIVITY

And Soon... A Big New HAUGS Building Supply to Serve the Okanagan

Yes, soon Haugs open a bright, new, modern building supply store. The greatest meaning it will have for residents of the Okanagan is that now you will be able to choose ALL your home building and improvement requirements under one roof.

WE'RE MOVING RIGHT ALONG!

From kitchen ranges to complete bathrooms... from electrical supplies and fixtures to a complete home improvement centre... and much more eagerly awaits your inspection when the new Haugs Building Supply opens on Highway 97 at the eastern city limits. Everything you need for building or remodeling will be contained in this spacious, modern structure, and, of course, you'll still be exposed to the same friendly, helpful service that has been our custom in the past. Be among the first to see it... attend our opening in the near future.

Watch for Opening Dates of Our New Store

NATIONAL JAYCEE OFFICERS CHECK CONVENTION PLANS

Officials of the Canadian Junior Chamber of Commerce met in Kelowna in October 1963 with the Kelowna Jaycee convention committee to look

over the site and review convention plans for 1964. Over 100 members and their wives will attend. Dennis Stefanski, Montreal, executive director

of the Canadian Junior Chamber of Commerce, and Bill Rowe, Calgary, vice-president, supervised the operation of the Canadian Jaycees' visit with David Hume

of Kelowna, who is national convention chairman. The convention is being held in late June 1964.—(Courier Photo)

New Guerrilla War Said Brewing in Borneo

JESSELTON, Malaysia (AP) — Another "tiny little guerrilla war" is brewing in Southeast Asia. If it boils over, it could become a second Viet Nam.

This time the island of Borneo is the setting for jungle ambushes, sudden death and fanatic communism. More than two-thirds of the huge island belongs to Indonesia.

The fighting and diplomatic manoeuvring pit the four-month-old Malaysian federation and its British protectors against three foes: Indonesia, a hard-bitten internal Communist underground, and an ostensibly nationalistic "people's rebellion front."

President Johnson sent Attorney General Robert F. Kennedy to Southeast Asia in January to counsel mediation, and units of the U.S. 7th Fleet have waved the flag in the Indian Ocean, which Indonesia considers home waters.

Further U.S. concern is probable because Malaysia's foes are attacking the federation at its weakest point—the former British Borneo territories now called Sabah and Sarawak.

More than 100 guerrillas have been killed or captured in these two states, which make up the northern half of the island.

Malaya and Singapore, strongest states in the federation, have not been touched directly but are suffering from an economic offensive launched by Indonesia.

Britain, already heavily committed around the world, is hard-pressed to honor its agreement to defend its former colonies.

Caught in the middle but apparently oblivious to the trouble is the sultanate of Brunei. This tiny British protectorate, launching amid rich oilfields on Borneo's northwest coast, survived one revolution in 1962 but appears headed for deeper involvement.

Some of Britain's best anti-guerrilla strategists, men who fought in the nine-year war against Malaysia's Chinese Communists, are here.

Helicopters rush troops through the seacoast mist over green-blanketed mountains, chasing the elusive

enemy. Other missions wait out the weeks and months in dusty, sunbaked outposts, standing vigil day every day to ward off possible attack.

Guerrilla tactics, training grounds and "safe havens" are in Indonesian Borneo.

Indonesia's President Sukarno, seeing Malaysia as a threat to his legitimacy in Southeast Asia, has sworn to crush the infant federation.

Disruption of Borneo's economy has been a prime mission of many guerrilla bands, especially in the north. Cut-off roads, sabotage of power lines, and burning rubber and copra plantations, operated mostly by Britons.

The guerrillas are amazingly well equipped. Captured equipment includes British and Belgian weapons and, unfortunately for the U.S. image among British troops, a large amount of American field clothing, packs and the American-made Armalite rifle, a weapon with famed killing power.

The Armalite, a .223-calibre weapon with high muzzle velocity, is government issue for U.S. troops in South Viet Nam.

However, some of Sukarno's elite jungle troops carry it. The American expansion is that Sukarno got the Armalite through private channels.

AMERICAN PLANES — American-made B-25 two-engine Mitchell bombers and F-4 Phantom fighters, both Second World War types, are used by the Indonesian air force to raid over Kuala Lumpur and British outposts in what appears to be a war of nerves.

British officials, to prevent escalation of the conflict, order their troops not to fire.

With this air force, a population of 100,000,000, and an estimated armed strength of 200,000 men, Sukarno heavily outguns the Britons.

Britain's strength in Borneo is dwarfed but probably not more than 600 troops. Its air force consists of helicopters, transports, and observation planes. Malaysia, a country of 10,000,000 has only green troops. They have done poorly against the guerrillas and are not highly regarded by the British.

Some British interpreted Sukarno's willingness to meet Attorney General Kennedy as proof Indonesian spirits are flagging. Some officials said Sukarno hopes the British can be bluffed out, as the Dutch were from West New Guinea in May 1963.

Pearson Policy Secretary New Government Post

OTTAWA (CP) — Tom Kent, Mr. Kent as the most powerful policy secretary to Prime Minister Pearson, is the key figure in an intriguing Pearson experiment in government organization.

The tall, 43-year-old former newspaper editor acts in effect as Mr. Pearson's chief of staff. He has a finger on the pulse of virtually every major area of federal government and is also assigned the task of keeping the prime minister in touch with policy development.

His job grew out of a feeling that the range and complexity of government problems and activities make more demands on the prime minister's time than one man can meet.

What seemed to be needed was somebody to carry the prime minister's thinking into the committee rooms and into the discussions where final touches were being put on policy.

At the same time, the prime minister could be kept abreast of policy shaping up in the 22 government departments.

Mr. Kent is the man entrusted with both these tasks.

FILED MODERN NEED — His job reflects the increased role a prime minister plays in the coordination, direction and leadership of government. Similar posts have developed in Britain and the United States where the chief executives found a need for a chief of staff.

Mr. Kent's duties were described by the recent cabinet conference outlining the recent cabinet reorganization and coordination of government departments in this official language.

Mr. Tom Kent, policy secretary to the prime minister, will be responsible for assisting the prime minister in this coordination of government policies through the cabinet committee system and in the direction of federal-provincial liaison arrangements.

That was the first public acknowledgment that Mr. Kent, who had been called co-ordinator of programming until then, was Mr. Pearson's top man on policy.

Originally appointed last May at \$20,000 a year, he is becoming a permanent channel through which the prime minister exercises his leadership.

With the cabinet operating through nine committees, Mr. Kent's sensitive finger is directly on their pulse. Mr. Pearson is chairman of two of the committees—defence and external affairs, and federal-provincial relations.

Newspaper men gossip about creating the Liberal vote 75 per cent.

One reason for his desire to stay in the background is the sensitive nature of his liaison between Mr. Pearson and the ministers.

His influence in both directions is indirect in finding to himself positive solutions to difficult problems—preferably before they become public issues—and in co-operating with ministers and top civil servants in bringing about a change in direction of policy.

DAILY MEETINGS — Mr. Kent has sometimes been compared to Sherman Adams, the former New Hampshire governor who was President Eisenhower's chief of staff at the White House in a sense it is a valid comparison except that Mr. Kent works no independent executive power.

The executive end of the prime minister's office is Privy Council Secretary Gordon Robertson who acts on the basis of cabinet and prime ministerial decisions.

Mr. Kent and Mr. Robertson together see the prime minister daily so that all three will know in what areas each is working.

The arrangement also relieves Mr. Robertson, as a civil servant, of having to take account of political matter.

Examples of Mr. Kent's work are not generally known because they occur behind the scenes.

STILL EXPERIMENT — Nevertheless, observers here are convinced he contributed to two policy changes that had got before the public. One was the changes made after Finance Minister Gordon's 1963 budget, and the other the alterations in the federal government's approach to the private sector of industry after talks with the business community.

A third illustration in such circumstances is in a particularly difficult position. It is a type of internal government which still is in the experimental stage with the current administration.

However, by remaining in the background by allowing any of the talents directed to him by outsiders and by maintaining the confidence and trust of the ministers and the prime minister, Mr. Kent has developed the experiment in almost nine months to a degree of permanency.

UNMATURED DEBT — In the six fiscal years since 1957, Canada's national unmatured debt has increased to \$17,500,000,000 from \$11,500,000,000.

PADDLE BOARD GIRLS PART OF NIGHT REGATTA SHOW

Night time entertainment is being prepared here during the day at Kelowna's Regatta Pool for the annual Paddle Board Regatta. The girls, under the direction of Mrs. Joan Nagel appeared on the four nights of the Regatta last year and proved to be a great hit with the over 15,000 who attended night shows. The 1964 Regatta will run Aug. 12, 13, 14 and 15. (Courier Photo)

"Sweet 16" Building Renovated Last Year

The Sweet 16 Ltd. building on Bernard Avenue in the centre of the downtown business area was renovated during 1963. The interior was completely modernized. A pink and grey theme was chosen for the shop of Peter Van Construction Ltd. and Sweet 16. The building was painted in its new tone but, they hired Kelowna was bought by Sweet 16 some weeks ago. New light fixtures, racks, men to do the work. "There were painters and carpenters and cement men, I have to see how many," Mrs. Norris said. When Sweet 16 reopened in its new quarters, the sales staff was more than doubled, so there are now seven sales clerks. The store was extended back a fare lifting at the same time and widened until it was twice the size of the original store. The interior was completely modernized. A pink and grey theme was chosen for the shop of Peter Van Construction Ltd. and Sweet 16. The building was painted in its new tone but, they hired Kelowna was bought by Sweet 16 some weeks ago. When Sweet 16 reopened in its new quarters, the sales staff was more than doubled, so there are now seven sales clerks.

Some Germans Trying To Forget War's Scars

BONN, West Germany (AP) — A commandant of a Nazi concentration camp is sentenced to life in prison. A cabinet minister quits because of evidence that he sat on a Nazi special court. A lawyer, under indictment for Nazi "mercy killings," escapes police surveillance and flees to South America. Nearly 19 years after the collapse of nazism there are still West Germans doggedly trying to forget the whole thing. At any given moment there may be several war crimes trials in progress in West Germany. They often drag on for months and get little public attention.

Pre-trial investigations are long and difficult because of the length of time that has elapsed, the reluctance of some German witnesses to testify and the difficulty of getting reliable evidence from behind the Iron Curtain. The trials evoke little interest among West Germans, most of them preoccupied with one aspect or another of their country's "economic miracle."

A typical reaction to questions from a Westerner: "Why can't we forget about these things after so many years?" Another: "You dropped bombs on women and children, didn't you?"

NEW GENERATION To young people especially it all seems remote. A generation has grown up that was not even born when most of the crimes occurred. The most serious dutifully read the reports that the better newspapers dutifully print and wonder—as one youth put it—"how easy it is to make men into beasts."

But this seems to be a minority. "Newspapers are made by older people," said one youngster, to explain why stories were printed on trials at all. Some authorities have arranged for high school students to attend war crime trials, but the practice is not widespread.

TWO MAJOR TRIALS In the next few months two highly important ones will be going on at once. This is unusual.

One of the trials is the biggest that West Germans have organized since the war: 22 men accused of taking part in the killing of millions at the Auschwitz extermination camp. The sessions began just before Christmas and may continue for a year more.

The other may last as long, although only one defendant is available. He is Dr. Hans Hefelmann, 58, the head of what the Nazis called the "mercy killing" section of Adolf Hitler's private staff.

The program he co-ordinated had nothing to do with mercy. It was a plan to free hospital beds, doctors and nurses for war wounded by killing off about 200,000 mental and physical defectives who may or may not have been curable.

There were to have been four defendants in this trial, and eight or 10 in another later. But of the four, two died recently: One a suicide, and the other possibly a suicide. A third fled the country last summer.

War crimes trials began at Nuernberg in 1946. Britain, the United States, Russia and France took part in an international tribunal that tried 22 of the top remaining Nazi leaders. Eleven were sentenced to death. Hermann Goering, long Hitler's No. 2 man, cheated the executioner by taking poison two hours before he was to be hanged.

British, U.S. and French military courts sentenced 5,025 persons, of whom 800 were put to death. The Soviet Union and other East European countries, whose peoples the Nazis had tortured even more savagely than others, jailed or executed thousands more. The Soviet Union alone is believed to have passed about 10,000 sentences.

NO CAPITAL PUNISHMENT West German officials estimate that their own authorities have tried another 5,500, but only five have been executed. West Germany abolished capital punishment in 1949.

Prosecutions were not co-ordinated in West Germany until 1958, when a central war crimes office was set up at Ludwigsburg. It estimated that about 80,000 Germans had taken part in Nazi mass murders. By that time the big majority had

OVER 50 YEARS OF SERVICE TO KELOWNA

PROGRESS THROUGH PRINTING

The name Leathley has been associated with the Printing business for over 50 years in Kelowna. At Kelowna Printing you will find the most up-to-date machinery able to produce the finest multi-coloured work or the simplest card. When in need of printing . . . call us.

NEW AERIAL LADDER SPRAYS FOG ON KGE FIRE

The new aerial ladder of the Kelowna volunteer fire department was used extensively Oct. 6 at the fire which destroyed the Kelowna Grocers

Exchange Building. No. 12. The aerial ladder at first directed water on the blaze from the east side. Later it was moved to the left hand corner

of the building and then to the back. As a precaution, the truck remained at the scene all night. The burning view of the building tonight the fire for

if the fire was estimated at \$10,000. The only other big fire in Kelowna during 1963 was the big lodge that was called in September.

TOP CURLERS HERE

Curling fans in Kelowna had a look at how the champions win and why last November when this famed quartet appeared in Kelowna for a one-night stand. They are left to right: Ernie Richardson (four times national and world

champion), Hec Gervais, Alberta and Canadian champion; Reg Shuter, perennial B.C. champion during the late forties and early fifties and last year's Alberta King, Jim Shuter. The gentleman in the suit at the left was not identified.

Tap the Brains Wilson's Slogan

LONDON (CP)—Labor party leader Harold Wilson plans to own new frontier approach to government if he is elected this year. He wants to tap the brains of Britain.

He talks of a widespread "release of energy," believing that under the Conservatives talent has been drawn mainly from an upper-class elite. He also says there has been a "touch of anatectosis" in government.

Specifically, Wilson said in a television interview, he wants to follow the Kennedy administration's example of bringing outside experts into government—scientists, advisers, university professors, economists. These would form "inter-disciplinary groups at top level," before any decisions were taken.

The Conservatives have already set up two revolutionary planning groups, on economic development and national income. But Wilson wants to extend this system, particularly to such problems as weapons development, on which the Conservatives have been accused of bad planning.

COMMENT DIVIDED

Press comment among Conservative newspapers is disappointed. The Financial Times political correspondent, Ronald Butt, believes that if Wilson started drawing political structure of Whitehall, it might undermine the independent role of the British civil servant who now provides a tradition of continuity which the party in power, it might at the moment, signal a return of political patronage.

But The Sunday Times believes a move towards civil service in government is inevitable. The paper's Times editor, Marguerite, says "Wilson's plan is a general election. The British civil servant will be a permanent official, not a political appointee, and he will be recruited from all parts of the universities."

Marguerite says a "new era of power of technicians in Whitehall can and must be balanced by a corresponding revolution in Westminster. Parliament must be reformed. It is a challenge to the 'old-fashioned' way."

Smothers Brothers Ride High On Latest Folk-Song Craze

HOLLYWOOD (AP)—Yes, Virginia, the name really is Smothers and they really are brothers. And the Smothers Brothers are riding the folk-song craze to a pair of fortunes.

Within three short years, the brothers have played most of the television variety shows and cleaned gold from concert—190 in 1963. The juiced, stinging-eyed pair net as much as \$7,500 for a night's work.

They sing folk songs but they are different from most of the guitar-strummers. Their stock in trade is offbeat patter that seems to be created at the moment. It isn't, of course. Their ad lib is perfected by months of polishing.

Tom, the older, wacky brother, lives in Hollywood with his bride, Dick, two years younger at 25, makes his home with wife and baby in Salinas, Calif. "My wife's home town and a good place to rest off during the brief time we get out."

BUSINESS GOOD
"Business has been good," reported Tom. "In one week we were paid \$7,500 for not doing our second Judy Garland Show (she decided to do it alone). On one day's notice we did a Hollywood palace show for \$7,500. And we got \$3,500 for appearing at The Troubadour—not our usual price, but our

Quadracentennial At UCLA Has Guthrie As First Speaker

HOLLYWOOD (AP)—Sir Thomas Guthrie, Irish giant of the theater with a touch of godliness, was in town to say that

some kind words for the 400th anniversary of the birth of William Shakespeare, both 400 years ago April 23, Guthrie came here as the first speaker in a program

planned by the University of California at Los Angeles, one of many such celebrations in all parts of the world.

Before taking off for his lectures at Berkeley and the University of California, the famed director of the theater was asked what he thought of this year's event for the third year.

"Oh, I think it's a very good idea," he said. "It's a sign of a new spirit in the world. It's a sign of a new spirit in the world. It's a sign of a new spirit in the world."

He concluded that the event was a "very good idea" and that it was a "sign of a new spirit in the world."

Service and Satisfaction have made T. J. FAHLMAN Kelowna's Most Progressive Plumbing and Heating Contractor

Since our formation in 1956 we have kept pace with our growing community through service and satisfaction in handling and installing adequate heating and conditioning units, plumbing facilities and we were one of the first in Kelowna and district to undertake the installations of automatic gas heating.

If you have not already found the advantage of gas heating, we invite you to call us today and allow us to show how economical and convenient it is. . . you'll also be surprised at the modest cost of installation.

THANK YOU
We would like to take this opportunity to thank you for your past patronage and we are looking forward to serving you in 1964.

SEES WORLD
DURHAM, England (CP)—Malevolent McGee, 25, has been hitch-hiking around the world since 1962. He left Durham with £12 and has travelled 14,000 miles through France, Italy, Greece, Turkey, Iran, Pakistan and India. He still has three shillings left.

HOWS TO TV
MARGATE, England (CP)—Charlie Smith, who has run his Punch and Judy show on a Kent bench for 41 summers, is retiring because he says children no longer want Punch and Judy in the television age.

DELIVERS MILL
BRISTOL, England (CP)—A 22-ton mill needed by a Montreal chemical firm for coating surfaces with paint was assembled and delivered in less than a week. The mill was flown to Canada by air freighter.

TV NETS FINE
LONDON (CP)—A man was accused in court of fitting a television set to the back seat of his car so that it could be viewed through the rear mirror. The court fined him \$9.

ELDERLY RCMP DOESN'T TALK
VANCOUVER (CP)—W. J. D. Jack Dempster, one of the few surviving members of the old Northwest Mounted Police, is not the man to see if you're looking for tales of derring-do in the North.

"It was all just normal, just routine," says the 87-year-old former inspector whose name graces a road that runs from Flat Creek to Eagle Plain in the Yukon.

But what he calls "routine" might be high adventure to others. It included, for example, the risky job of finding a famous lost Northwest Mounted patrol headed by Inspector E. J. Fitzgerald in 1911.

Fitzgerald had been travelling from Fort McPherson to Dawson City when the patrol lost its way, turned back and ran out of food in blinding snowstorms.

In March, 1911, Inspector Dempster was ordered to look for the lost patrol. The mission was considered hazardous because of the soft snow of spring and the sudden storms that could cause an ice breakup and leave them isolated.

Official accounts of the search show that Inspector Dempster, after days of hardship, finally discovered the ill-fated Fitzgerald patrol. All its members had frozen to death.

New Diet Says Eat Often Trying New Avenue Of Attack

MADISON, Wis. (AP)—For folks chronically overweight, there are diets and then there are diets—endlessly.

Only one, however, calls for six meals a day. And only this one is designed to cope with increasing scientific evidence that too many pounds simply aren't always just a matter of too many calories, that it's a matter of body biochemistry as well.

Through a still experimental, but remarkably promising, dieting scheme, which allows one to eat a good bit more than is permitted in the usual low-calorie diets, attacks overweight by correcting or compensating for abnormalities in the amazingly delicate, complex chemical pathways that convert food into the host of protein, carbohydrates and fats necessary for life.

Developed by Dr. Edgar S. Gordon and Dr. Marshall Goldberg and Mrs. Grace J. Cheesey, research dietitian of the University of Wisconsin Medical School, the regimen also includes periodic doses of drugs to stimulate kidney function and an excellent form of music to lower the level of fat in the blood.

BUY REAL HOUSES
RAIDMILL, ON - TRENT, England (CP)—More than half the 10 RCAP houses up for sale in this Nottinghamshire town were bought in 10 days by British families. Prices averaged \$15,000.

EAT CHILES
Chiles are recommended as an ideal outdoor meal because it is easy to carry, easy to digest to stimulate kidney function and an excellent form of music to lower the level of fat in the blood.

S. M. SIMPSON LTD.

WORK ON THE ADDITION to the Kelowna Curling Club began early in September. This picture shows construction of the area that now houses the two new sheets of ice. The project required about four months to complete. (Courtesy photo)

Curling Facilities Greatly Enlarged

Curling facilities in Kelowna since 1963 were greatly improved by the addition to the Kelowna Curling Club quarters on Water St.

Improvements were made to every section of the building. The new sheets of ice were pumped from four tanks making the kitchen is much roomier and it possible for 45 curlers to play more pleasant to work in.

On the north side, where the area and kitchen, it is possible improvements were made. A for the club to cater to over 100 "dine and dance" section has curlers during tournaments. This been installed. Covering more was done recently for the ladies than 2,000 square feet. The kitchen and the kitchen two brightly-lit and the kitchen is equipped with

a new stove, new refrigerator and a larger grill will join the kitchen crew soon.

SATURDAY DANCES

Also in the new quarters area a dance is held each Saturday night for curlers and this is relaxing on with many curlers. A basement with a four area close to 2,000 square feet a hearing completion and already has new restrooms and a good sized storage area of about 1,000 cubic feet. This will be used to store chairs and miscellaneous articles belonging to the Kelowna Curling Club.

A new furnace has been added to heat the "basement" club but has not been used since the original heating unit provides sufficient heat at present.

Plans are also in store for the installation of a bar and local

ers in the basement which is four times the area of its predecessor. The feature most necessary for a curling club is made through the facilities of a six-cylinder motor which pumps ice through pipes beneath the ice surface. A new steel frame tank was added, also with the original cement bridge tank the ice to be kept throughout the curling day.

The pulverized ice machinery is located and stored in a building on the east end of the club quarters in a room measuring 29 feet by 36 feet 18 feet.

AUTOMATIC

The machine is completely automatic and if anything goes wrong, the operation ceases. An interesting feature of the machine is the fact that it can be set to freeze only two or four sheets in addition to keeping all six in good condition.

A parking area is taking shape on the building's north side. Present plans call for the graveling of this area. Work is also being done on a front entrance that will come in from the parking lot.

DISPLAY FOODS

LONDON (UPI)—Nine Canadian food firms will have displays at London's fifth dedicated exhibition in March. Among products designed to make British markets water are maple syrup, oranges, pickles and a wide range of kosher foods—products of kosher foods.

Garry's Shell Service Station New Addition To Bernard

Garry's Shell Service at 542 Kovaks worked with advisors to Bernard Avenue opened May 13. It is owned by Garry Kovaks.

Mr. Kovaks spent \$1,000 on improvements in the building. The building had been closed six weeks when he moved in. The building, which is 50 feet wide and 130 feet long, can serve six cars at one time, he said.

RAMP

Inside there are offices, a showroom and the shop. Mr.

Kovaks worked with advisors to decorate the showroom. It has a ramp for cars to be displayed and three cars can be shown at one time.

One wall is painted black with a pattern draped to suggest a natural theme.

Mr. Kovaks came to Kelowna from Hungary eight years ago. He has been in the garage business since then. He likes to fish and hunt.

There are three other men working in the shop. Hank Van

Montfort and Ted Johnson are mechanics. Harvey Johnson is the attendant.

LONG EXPERIENCE

Mr. Montfort has had 25 years experience in the garage business. He has lived in Kelowna for 25 years, is married and has three children.

The Johnsons have been with Garry's Shell Service for two months. They both have five years experience in garage business.

Mr. Kovaks said he intends to change the name of his station since he has changed to another gas company. Plans are also underway to have the exterior of the building repainted.

Growing Through Customer Satisfaction

COLORFUL, JUST-RIGHT FLOORCOVERINGS AT PRICES TO FIT EVERYONE'S BUDGET

Kelowna's Only FLOOR COVERING SUPERMARKET

At Flor-Lay Services Ltd. you will find the largest selection of floor coverings, wall tiles and counter top material in the interior of B.C. For 14 years now, the management and staff of Flor-Lay have been advising, and assisting Kelowna and district residents with the finest in flooring values available.

The staff takes great pride in helping you select the proper styles and colors for your home. In fact, their constant aim and efforts have but one purpose . . . to put "beauty afoot" in your home.

Drop in and visit us soon. We will give you advice on how to do-it-yourself or our expert service staff will do installations for you.

Why Should You Buy A Carpet?

Carpet makes such a difference in your home!

- **EASIER TO MAINTAIN** . . . carpet needs no weekly waxing.
- **BETTER ACCOUSTICS** . . . carpet's "Sound-proofing" qualities soften room noises.
- **SAFER** . . . carpet eliminates slipping and sliding, less danger of falling.
- **LESS EXPENSIVE** . . . wall-to-wall carpet is more luxurious and less expensive than hardwood or terrazzo floors with small rugs.
- **COMFORTABLE** . . . cushiony carpet is more comfortable to walk on.
- **RELAXING** . . . your feet won't ache when you walk or work on carpet.
- **BEAUTIFUL** . . . carpets fit in so well with the decor of any room in your home and makes it look so luxurious.
